Lancaster Farming

Vol. 19 No. 16 | Lancaster Farming, Saturday, March 9, 1974 | $2.00 Per Year

The Lancaster County 4-H Baby Beef and Lamb Club met Wednesday night at the Farm and Home Center to elect officers for the coming year. The newly elected officers were installed at the meeting. They are, from left to right: Rick Hess, Strasburg RD1, vice-president; Linda Good, Lititz RD2, secretary; Gary Brubaker, 345 Running Pump Road, Lancaster, treasurer, and Joseph Lefever, Manheim RD4, president.

$2021 Average at Bare Dispersal

A lot of good cows left Pennsylvania on Monday after the dispersal sale by Lebanon County's Bare Brothers. The buyers, though, both out-of-state as well as Pennsylvanians, parted with a lot of cash for the privilege of trucking away the cows. The brothers took in close to $250,000 for their 123 head of Registered Holsteins, for a record-breaking average of $2021 per cow. This is the highest per cow average ever paid at a complete dispersal in Pennsylvania.

The previous average, about $1700, was set just last fall at a dispersal in Northhampton County.

Hershey Bare told Lancaster Farming on Thursday that at least half the cows went out-of-state to California, Washington, Canada, Virginia, Indiana, Illinois, Ohio, New York, Connecticut, Massachusetts and New Jersey. The sale was conducted by the R. Austin Backus auctioneering firm from Mexico, New York.

The top price of the day was paid for a two-year old which milked 17,000 pounds

Dairy Day speakers Donald Ace, top, and Jerry Dryer.

1974 Dairy Day Attendance Good

Close to 300 dairymen crowded into the Lancaster Farm and Home Center on Tuesday for the 1974 Dairy Day program. They heard from four main speakers who talked about the measurement of management ability, dairy imports, mastitis control and dairy waste problems.

Ralene Harbold, reigning Lancaster County Dairy Princess, also addressed the group.

Donald Ace, dairy extensionist from Penn State, told the assembled milk producers that if they couldn't make a living with their forage programs, then they wouldn't be able to balance their budgets with purchased feed ingredients.

Penn State's forage testing service, Ace noted, has shown that silage quality across the state this year has not been too good. "The samples we've seen usually look OK on a dry matter basis," Ace said, "but they have more water than in other years. Last year, if you fed a cow a bucketful of silage with 60-percent moisture, she's not going to do as well this year on that same bucketful of 76-percent silage."

Hay crops, in contrast to silage, were exceptionally good this year, Ace said. Especially in Lancaster County.

Although he feels corn silage as a crop is unsurpassed for value and energy, Ace cautioned the dairymen on overfeeding the material. "I've seen some

FARM TRENDS

by Dick Wanner

Time to Hit Garlic in Wheat

This is the year to knock garlic out of your wheat acreage. Garlicky wheat isn't much of a problem locally in most years, with buyers here docking a nickel or so for each bushel. Expectations are for a bigger crop this year, with more garlic, and that could push up dockage rates as buyers get more choosy. One grain buyer we talked to said dockage could go to 10-, 15- or even 20-cents a bushel this year.

If you're docked on the basis of weight, garlic this year will cost you more than last year simply because wheat prices will likely be higher. And 3- or 4-percent of $4.25 a bushel is more than 3- or 4-percent of $3.00.

(Continued On Page 19)

Farmland Assessment Meet Set

Farmland assessment legislation will be the subject of the second in a series of educational seminars presented by the Farm and Home Foundation of Lancaster County. This public seminar will be held Wednesday evening, March 13 at 7:30 p.m. in the auditorium of the Farm and Home Center, 1383 Arcadia Road, Lancaster.

The program will be conducted as a panel discussion including Reno Thomas and Kent Shelhamer from the Pennsylvania State House Agriculture Committee at Harrisburg; Benjamin F. Weaver, County Administrator of Lancaster County and J. Arthur Rohrer of Paradise, RD1, farmer and member of

Mrs. Margaret Jacobs has been milking goats since 1934, and is presently milking 15 head on her Chester County farm.

Margaret Jacobs Claims . . .

'Goats are Smarter than Cows'

Margaret Jacobs can rattle off goat pedigrees faster than most people can say the alphabet. One of Chester County's premiere goat boosters Mrs. Jacobs has been milking goats since 1934. Her farm is just off Route 23, near St. Peter's Village.

We visited Mrs. Jacobs recently to find out a little bit about her operation, and a little bit about goats. We asked her, first of all, why she kept goats instead of cows. "I like goats because they're easier for a woman to handle. I'm a widow, and I do most of this work myself. And then, you know, goats are smarter than cows. And they make wonderful pets. Actually, I used to have cows, but I sold them when I ran into labor problems."

There are presently 15 goats being milked on the Jacobs farm. Mrs. Jacobs milks twice a day, and her best milker is currently producing about 16.5 pounds daily. All her producers get grain in the milking parlor.

Modified milking machines - with only two teat cups - are used to speed the milking chore. "It really takes more time to milk 20 goats than it does to milk 20 cows," Mrs. Jacobs said. "We work pretty hard for our money." Milk from Mrs. Jacobs' goats is sold on the quota system, and she tries to have her animals bred for peak production over the winter months. The herd is on DHIA test, and Mrs. Jacobs says she pays the same testing fee for a 100-pound goat that a dairyman pays for a 1200-pound cow.

Production records for goats are figured on a 305-day lactation period, just as for cows. A goat, however, may continue producing for anywhere from 12 to 18 months. In fact, one of the Jacobs goats, a Tagenborg, produced 4000 pounds of milk, 120 of fat in one 305-day lactation period, and didn't even pause for breath before starting her second 305 days in which she posted a 3000-pound record. Mrs. Jacobs has a son of that female, Shagbark Erica's Eric,

Markets provided by Commodity Dept., Reynolds Securities, Inc.

Local Grain

Thursday, March 7

These prices are made up of the average prices quoted by five participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, March 7, 1974 are as follows:

	Bid+	Offered+
Ear Corn, New	75.00	83.00
Shelled Corn	3.10	3.36
Oats, Local	1.45	1.70
Oats, Western	1.95	2.17
Barle	2.50	2.81
Wheat	4.71	4.83
Soybeans	5.35	5.65

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

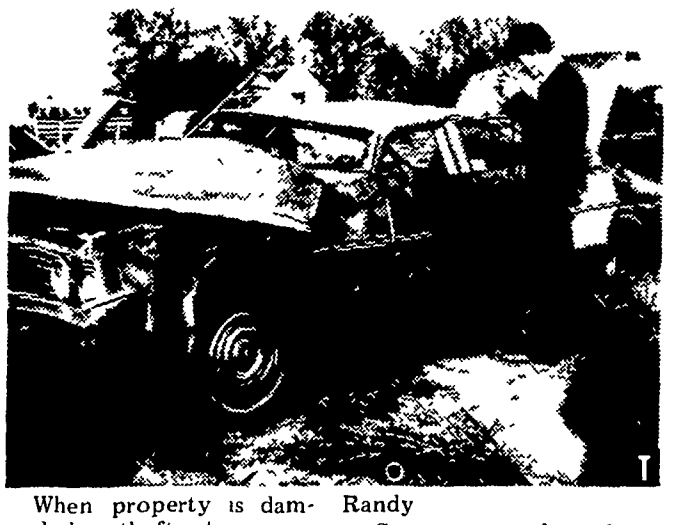
4-H PHOTO WINNER SAYS CAMERA CAN SAVE MONEY



When property is damaged by theft, fire or a car collision, a camera can come to the rescue, says award-winning photographer Randy Waters, 16, of Erick, Oklahoma Randy is a national winner--and recipient of a $1,000 Eastman Kodak Company scholarship grant--in the 4-H photography project conducted by the Cooperative Extension Service and sponsored by Kodak More than 110,000 4-H members are enrolled

Snapshots of property, Randy says, can help prove loss and win compensation from insurance companies, which generally pay only for lost or stolen items that can be documented

A camera can be a boon when calamity strikes on the road, too Photographs are evidence of the conditions under which an accident occurred "Photos of the vehicles involved and then license tags, first witnesses and any telltale skid marks may be useful later," says Randy

Some more advice from Randy on using a camera to prepare for times of trouble

Substantiate insurance claims with photographs of the front, back and each side of your home along with the tool shed, outdoor playhouse and swimming pool Winter's a good time for taking such photos. With leaves off the trees, construction details will show up Make a room-by-room photo inventory of your possessions, noting the cost and purchase date of the items on the back of each photo. Keep a photo record of valuable hobby collections coins, stamps, tools

• *Support consumer complaints* with close-up snapshots of damaged merchandise Send them to the manufacturer or shipper with a letter of complaint

• *Document your camera* on film Ask a friend to shoot that valuable piece of equipment for you

RAISING TURKEYS IS PROFITABLE ALL YEAR—NOT JUST DURING THE HOLIDAYS

Only a small number of turkeys grown end up as a holiday dinner. All the others help celebrate weddings, birthdays, anniversaries and all those other occasions. Any day is good turkey eating.

Turkeys are a booming business and the demand for local grown birds is better than ever.

For more information call Pennfield and "talk turkey". We'll show you the facts and figures about getting your share of this profitable business.

If you're already raising turkeys, raise your profits with a Pennfield feeding program.

A Pennfield custom-tailored feeding program may save you money. Let one of our area managers show you how.

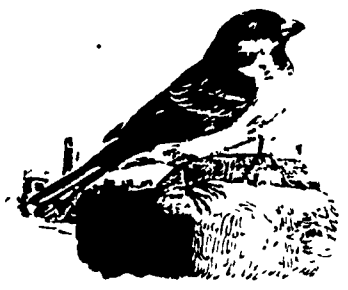
THE OLD FARMER'S ALMANAC

MARCH 11-17, 1974

False signs of spring now.

Fix leaky roofs . . . James Jordan held his breath for 8½ minutes March 13, 1956 . . . Everyone wears green on March 17 . . . Average length of days for week, 12 hours, 50 minutes . . . Third quarter of the moon March 15 . . . The Bible first printed in type this week in 1462 . . . Some robins and crows should be back north now . . . Animal hibernation about over . . . Whatever is begun in anger usually ends in shame.

Old Farmer's Riddle: Why is a clock like a condemned man? (Answer below.)



Ask the Old Farmer: When I recently purchased a small oak desk, I was told it was a Larkin desk — one that was given years ago as a premium by the Larkin Soap Co. How could they give a desk of this kind as a premium for selling soap? G.S., Atlanta.

The profit on the soap must have been substantial. They gave desks, bookcases, dishes and teapots. We own a desk and bookcase combined. Don't know how many hundredweights of soap it took to earn it.

Home Hints: Pierce the end of an egg with a pin, and it will not break when placed in boiling water . . Shellac will be difficult to apply and remain sticky unless it has been mixed with denatured alcohol before use *Riddle answer.* Its hours are numbered.

OLD FARMER'S WEATHER FORECASTS

New England: Storm first part of week with heavy rain and 3-5" snow in mountains; end of week very cold with light snow.

Greater New York-New Jersey: Heavy rain changing to flurries at first, then very cold; light snow latter part, then cloudy and raw.

Middle Atlantic Coastal: Rain to start, then clearing and mild; light snow and cold latter part, then warming.

Southeast Coastal-Piedmont: Heavy coastal rain at first, then clear and warm through region; end of week clouding up and cooler.

Florida: First part of week rainy; end of week cloudy and cool then rain in north and sunnier and warm in south and central.

Upstate & Western N.Y.-Toronto & Montreal: First part of week very cold with light snow; end of week cold with snow in west, flurries in east and cloudy in Montreal.

Greater Ohio Valley: Rain in east to start, then cold with snow throughout region, 4-6" snow in east; mostly cloudy and very cold latter part.

Deep South: Clear to start, then warm; cloudy and cooler latter part, then rain.

Chicago and Southern Great Lakes: Light rain and cold to start, then rain changing to snow, 2-4" in west; light snow latter part, then sunny and warmer.

Northern Great Plains-Great Lakes: Week begins cold with light snow in east and partly sunny in west, then 1-3" snow in west; end of week partially clear and much warmer.

Central Great Plains: Rain changing to snow at first in east, light snow in west and fair in south; sunny and warmer throughout region latter part, then light rain.

Texas-Oklahoma: Mostly sunny and cool to start, then warming in south and central and colder in north; rain latter part and cooler.

Rocky Mountain Region: First part of week clear and mild in central and east and intermittent snow in north; end of week clear and warm with showers in central.

Southwest Desert: Mostly clear to start, then becoming much warmer with highs near 80; end of week partly cloudy and cooler.

Pacific Northwest: Cloudy and showers at first, then clear and warming; clear and warm latter part, then rain.

California: First part of week generally clear and warm; end of week mostly cloudy with rain in north.

FEEDER PIGS 716 Compared with 754 head last week, and 736 head a year ago. US 1-3 20-35 pounds feeder pigs 16.00-30.00 per head, 1-3 35-50 22.00-33.50, 1-3 50-80 29.50-40.00, Utility 25-60 13.00-35.00 per head.

SHEEP 505 . Compared with 733 head last week, and 412 head a year ago. Wooled slaughter lambs steady to $1 lower. Few Choice 40-90 pounds new crop lambs 50.00-69.50, Choice 80-100 wooled slaughter lambs 39.00-44.00, Good 65-100 33.00-40.00, Utility 50-80 25.00-33.00. Slaughter ewes 8.00-22.00.

H.F. Nixon Heads Pest Committee

Henry F. Nixon, Director, Bureau of Plant Industry, Pennsylvania Department of Agriculture, has been appointed chairman of the Technical Advisory Committee of the Interstate Pest Control Compact.

Pennsylvania is a charter member of the compact and Nixon has served as a member of the governing board since the General Assembly passed enabling legislation in 1967. 14 states are now members of the compact.

The IPCC provides emergency funding, expertise and cooperation to stop insect infestations as they occur throughout the United States. Acting on their own, most states would require additional funding through an act of their legislature to meet emergency pest problems. In most instances, this would be too time consuming and a new pest could be established before effective controls could be started.

Nixon will head a committee comprised of representatives of three other member-states and one representative each from USDA's Animal Plant Health Inspection Service, U. S. Forest Service and Environmental Protection Agency. The newly-formed committee is charged with recommending emergency pest proposals to the governing board of the compact.

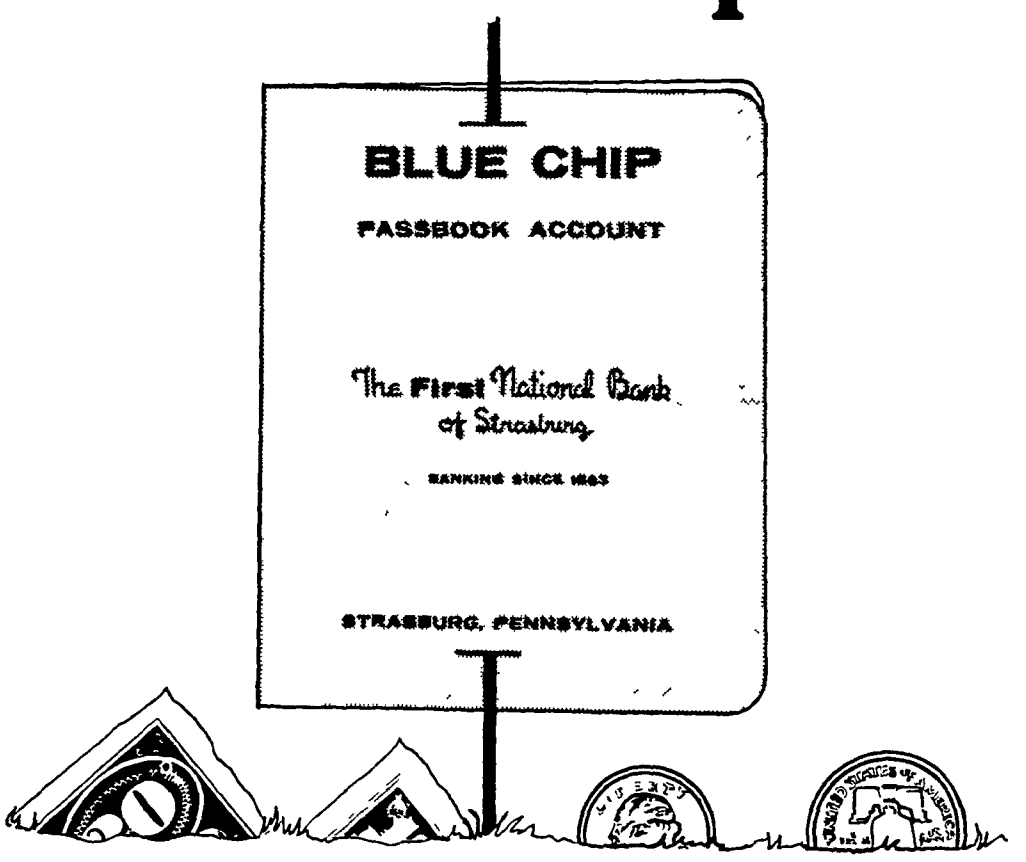
Already under consideration by the Technical Advisory Committee are several proposals to initiate a complete gypsy moth control program in areas where gypsy moth eggs have been discovered but still far removed from those areas generally recognized as having a heavy, well-established infestation of the voracious leaf-eating pest.

A complete program progresses in three steps beginning with the application of pesticides. This is followed up with use of Disparlue, a sex attractant, which confuses the male moth and discourages mating. The final step is the introduction of all known parasites that feed on gypsy moth eggs, larvae and pupae.

Successful compact projects in the past included a four-state survey to determine the potential of gypsy moths to be spread throughout the nation in recreational vehicles and the checking of a golden nematode outbreak in Delaware The golden nematode is a plant parasite that infests potatoes

Member states of the compact are assessed pro rata based on their respective crop and forestry receipts. The goal is to have a million dollar fund available for emergencies. At present, funding is just under $300,000.

Green grow your Blue Chips



at the Friendly First

Keep your money growing at the big interest rate of 5½% *compounded daily* with a Blue Chip Savings Account at the Friendly First. You'll soon have a big, meaningful balance from your initial deposit which can be as little as you like! Withdrawals can be made quarterly after 90 days.

FFA Project Book Winners Announced

The Owen J. Roberts Chapter of the Future Farmers of America entered 25 blue ribbon books in the State Project Book Contest held in Harrisburg. Records of projects from all over the state of Pennsylvania are judged at the contest for their effeciency, accuracy and neatness.

Gold medals were received by Howard Stoltzfus, farming program (5 enterprises - beef herd, hay, field corn, wheat, barley), Shane Clark, working for experience, and Bill Swienhart, sweet corn.

Silver medals were received by: Roland Kolb, truck crops, Eugene Kulp, farming program (3 enterprises - Dairy cows, dairy heifers, alfalfa hay) Tom Lowrer, farming program (3 enterprises - dairy cows, dairy heifers, field corn), Dave Nolan, dairy heifers, Owen J. Roberts Scrapbook, Darrel Stoltzfus, beef herd, John Swartzentruber, sweet corn and working for experience, and Steve Ussler, working for experience.

Bronze medal winners were Roy Fizz, working for experience, Ruth Friedhofer, farming program (2 enterprises - Laying hens, pullets), and Ed Mast, dairy heifers and field corn.

Howard Stoltzfus also won the Production Credit Award for the Norristown Area for the accuracy of his farming record.

Economics of Dairy Production Testing

by N. Alan Bair
Assistant County Agent
Lancaster County

Membership in our local DHIA production testing program is constantly changing. Dairymen's names are added to, and others dropped, from the list of those on test. An alarming number drop out, giving as an excuse that they cannot "afford" the dollar cost of the program.

Management

A profitable dairy, in these times of price-cost squeeze, can't operate on short-tem planning. In the dairy business it's the annual production and year after year high production that really pays the bills and returns more net profit. Knowing the average production per cow based on total herd production as determined from your milk check does no real good; because 10 percent of the animals in a herd may be "free riders" that could be removed. This culling would increase net profit while certainly cutting feed and labor costs.

Why is the production of all cows in Pennsylvania only 9,058 pounds of milk while the average of cows on DHIA testing is 12,965 pounds of milk? This extra increase of 3,907 pounds at $8 per hundredweight amounts to a return of $312 more per cow. The simple answer seems to be that those dairymen with good DHIA records use them for a better feeding, breeding, culling and management program. Of course this results in more net income.

Promotion and Sales

The auction ring is a pretty reliable barometer of the dollar value dairymen are willing to pay for replacement animals.

There is, of course, that occasional sensational animal that brings a record price, but they are few. While they help the average of a single sale they do not greatly affect the overall average of a year's business.

Recently, we had occasion to analyze the auction sale figures for more than 29,000 animals in the Ayrshire, Guernsey, Holstein and Jersey breeds. The dollar value exceeded $21 million for an average of $745 per head.

It is interesting to note the value buyers place on DHIA production records when bidding at sales. Although we do not have complete data for all breeds, the date for Guernseys and Holsteins appear to set the pattern.

Buyers of Guernseys and Holsteins paid an average of $978 for cows with records. Cows with no record but from tested dams average only $590.

Cows with records brought $182 more than cows with no records but from tested dams and $388 more than cows with no records and out of untested dams.

The cost of testing a herd of 50 cows in DHIA is about 8 dollars per cow per year.

Take the time to add up 3907 pounds of milk at a value of $312 and $388 increase sale value to see what you get for your $8 investment.

Little Joins Plain & Fancy

Plain and Fancy Egg Ranch Inc. Elizanethtown, has announced the addition of Donald E. Little to their staff of area sales and servicemen to serve in the state of Pennsylvania and New Jersey Little was formally associated with Westfield Egg Farms.

Little is a member of Dale Carnegie Sales Executive Club and has been associated ten years with the egg industry Plain and Fancy Egg Ranch, Inc. serves over seven hundred super markets, dairies, distributors, hospitals, restaurants, and institutional trade in a seven-state area.

Chester County 4-H Poster Contest Held

St. Patrick's Church, Malvern, was the scene this year for the Chester County 4-H Poster Contest held recently. Seventy-one county 4-H members entered posters expressing what 4-H is all about. The posters were evaluated with the ten best being selected for the state contest. From the state contest, the ten best posters are entered in the national contest. The top posters in the national contest are used for the National 4-H Poster, leaflets, displays, and slide presentations.

County winners were Dorcus and Sarah Nothstine, Downingtown; Kathy and Donna Williams, Morton; Dean Nafziger, Holly Scheib, Phoenixville, and Joan Liesau, Spring City. Other winners included Jennie Moore, Coatesville; Jim Stanton, Lincoln University; and Diane Westenberger, Exton.

4-H members receiving blue ribbons for excellent posters were Deborah Warren, Chester Springs; Susan Kulp, Pottstown; Alison Scheib, Phoenixville; and Debbie Feather, Betty Thompson and Fredie Keys, Cochranville.

Red ribbons were awarded to the following 4-H'ers for high quality posters: Bernadette Durkes, Terri McNamara, Linda Bianchi, Andi Brown, Lois Schlag, Mary and Pat McEvoy and Kathleen McHugh all of Malvern. Other 4-H members receiving red ribbons were Lee-Ann DuMars, and Jonathan an rah Weinstock, Phoenixville; Chris Williams, Morton; Bobbi Ekdahl, West Chester; Jay Bradford, Glen Moore; Esther Howe, Elverson; Jeff Staner, Berwyn; Charlotte Sample, Exton; and Janet Nothstine, Downingtown.

4-H'ers receiving white ribbons for good posters were from Malvern. Beth Pyne, Patti Nolan, Kathleen O'Donnell, Janice Terry, Coletta Rettinger, Joan Kronk, Barbara Benedict, Paula McGeeham, Michelle Deegan, Ann Page, and Mary Ellen Cobourn. Other members receiving white ribbons were Star Bowman, Carmen Thompson, Bonnie Murrey, West Chester; Carla Nafziger, Olega DuMars, Rachel and Michael Weinstock, Phoenixville; Janet and Edgar Latshaw, Spring City; Suzanna Howe, Elverson; Kathy and Susan Shaw, Downingtown and Joe Gueinond, Glen Moore. Also receiving white ribbons were Cathy and David McAllister, Oxford; Debbie Rettinger, Atglen; Jennifer Probst, Gary Barret, and Vicki Keys, Cochranville.

The 4-H poster contest is one of many activities sponsored by the Chester County Cooperative Extension Service of the Pennsylvania State University. 4-H is a youth organization for all youth, regardless of race, color or national origin between the ages of 8 and 19. For further information on 4-H call 696-3500.

Grassroots Opinion

According to the National Association of Manufacturers, "Interest on the public debt cost U. S. taxpayers $10.3 billion in 1963. For 1973 they will have to shell out an estimated $23.4 billion."

xxx

Arson is growing at a faster rate than other types of fires and even faster than most other crimes, a Stanford Research Institute report warns. Despite a general slackening of violent incidents nationally, arson is occurring at a rate ten times as high as in 1950 and is spreading to the suburbs, wrote Mr. Kendall D. Moll, a socio-economist and author of the report. The study recommended that investigative efforts in connection with arson be tripled, especially in small suburban and rural communities. According to statistics compiled through 1971 but still valid, arson losses account for possibly 30 percent or more of all building losses -- greater than all the other costs of violence combined. The number of deliberate burnings has tripled since 1960 and jumped by 13 times since 1950 -- a tenfold increase when population growth is considered. "The efforts currently being devoted to arson investigations are entirely inadequate to the needs," the report said. Unless arson squads are increased, said the report, "

all areas of the nation will soon be facing an arson problem as serious as the inner cities have confronted during the past five years."

xxx

WEST POINT, MISS, TIMES LEADER "We have no patience with that handful of truckers who decided that by their own unlawful actions they could force the nation to give more gasoline to trucks, and allow higher highway speeds for trucks If we, as a nation, survive this crisis, it will be through the cooperation of ALL citizens, in ALL walks of life There can be no favorites"

xxx

MOVILLE, IOWA, RECORD "If the gas situation is as short as reports try to tell us let's not be so 'pig headed' on this situation as the government was on the 'beef price freeze' Let's take action and get all these smog control devices off automobiles and enjoy another three to five miles travel on every gallon of gas. Just because the big cities need smog control . . . there is no reason for such measures out here in the boondocks. If government officials really want to get down to the real issues and means to help the fuel crisis, there are numerous ways that this condition could be helped and we think these corrective measures could be pushed first before the whole nation is thrown into a rationing situation."

xxx

MARION, WISC., ADVERTISER: "We wonder if the young drivers will know what to do with themselves this winter? There are too many youths who have never had a shortage of anything, except maybe trips to the woodshed . . . and we figure if they can take a cold floor in the morning, and will drink hot water in the milk for breakfast to get warm, will not watch TV to save on electricity, will get fighting mad if the government tries to take away or register their guns, and will get into politics and business to help get rid of our shortages, the country should be fairly secure. They demonstrated in war for us to get out, so we wonder if they will panic and demonstrate because of this energy shortage? Will they blame the government and parents? Or will they learn from all this and use their education and put it to work? It should be an interesting winter!"

xxx

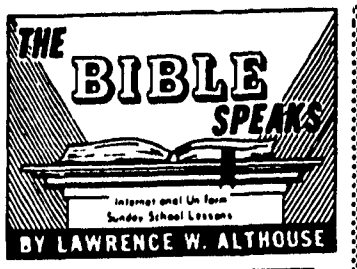
JUNCTION CITY, KANS, REPUBLIC: "Gas rationing during World War II got down to two gallons a week for 'A' class sticker holders. Today, with four times more cars, the gas shortage can be met if drivers will just cut down their gasoline from 14 5 gallons per week to 11 gallons per week We don't need another bureaucracy in Washington . . or out of Washington"

xxx

"The fundamental reason we need regulatory changes for the railroad industry is the public must be served"--Mr Louis Menk, chairman of the board, Burlington Northern Inc

xxx

"It is better to live rich, than to die rich"--Samuel Johnson



THE POWER OF INTENT LOOKING

Lesson for March 10, 1974

Background Scripture: Acts 3 through 4.

Devotional Reading: Isaiah 61:1-4.

The story is told that when the humble St. Bernard visited Rome, the Pope conducted him on a tour of the opulent holdings of the Papacy. Referring to Peter's response to the lame man at the Beautiful Gate (Acts 3:6), the Pope said, "Ah, Bernard, no longer need we say, 'Silver and gold have I none ...' " The humble monk paused and then quietly replied: "No, excellency, but neither can we say, '...in the name of Jesus Christ of Nazareth, walk.' "

With all of its great wealth, it seemed, the Church had lost its power to heal.

"Look at us"

Today, however, the Church is regaining its healing ministry. Pastors and lay people are again taking seriously Jesus' commission to "Heal the sick; cleanse the lepers ..." (Matt. 10:7, 8). Many practitioners of medicine are coming to regard the healing ministry, not as superstitious competition, but as another co-operative branch of the healing arts.

It is believed that Luke, the writer of both the Gospel According to Luke and the Book of Acts, was by profession a physician. It is, perhaps, with a physician's eye that he records the healing of the lame man by the Beautiful Gate. Note the dynamics he observes and records.

First, there is concentration of attention and effort. "Look at us," Peter commands the lame man. We often think of prayer as getting God's attention; in reality, it is a matter of giving Him our undivided attention so that he can do with us as he desires. Whether we are praying for healing or some other kind of help, it is important that we focus our attention and effort upon God.

Expecting to receive

Secondly, there must be the expectation that we will receive something. Luke tells us that the lame man "fixed his attention upon them, expecting to receive something from them" (Acts 3:5). Unless we truly expect something to happen, we keep closed the door through which the power of God must enter. Jesus himself could not heal in his own town of Nazareth because his friends and neighbors there did not expect to receive something from him.

Thirdly, there is the power of the living Lord. It is not prayer that heals, nor even faith, but the power of the living Christ through the Holy Spirit. The prayer of faith opens the door, but it is always Christ who heals. Peter said: "...in the name of Jesus Christ of Nazareth, walk."

A man asked for help. "...Peter directed his gaze at him...and said, 'Look at us.' And he fixed his attention upon them, expecting to receive something from them." And he was healed.

That is the power of intent looking.

NOW IS THE TIME...

TO DO THINGS ON TIME

Good farm management covers a lot of different items, but getting things done when they should be done is one of the most important; this takes advance planning which is also another ingredient of good farm management. Many farm practices have a time limit relating to when they should be done. If this is not recognized, then the results will be disappointing. The timing of spray applications is very important for good control of all pesticides. The planting of crops and the keeping of farm records, all need to be done on schedule as far as weather and human endurance will permit. A good manager is usually "on time" with all responsibilities.

TO BEWARE OF POLLUTION

All commercial farmers should beware that the general public is more pollution minded these days and all possible effort should be extended to prevent both air, water, and land pollution. Good management and a good agricultural image in the community will help build good public realtions with a minimum of complaints. With the spring growing season at hand all farmers are urged to be extra careful in spreading livestock and poultry wastes, in surface drainage from the barnyards, and in the application of all kinds of spray materials. To recognize the position and the rights of others might be a good place to start. To use good common sense and to be a "good neighbor" are other acceptable approaches.

TO CONTROL RODENTS

With improved weather conditions at hand and more to come, all property owners are urged to eliminate rats and mice before they move out into the open areas. Some buildings are rather heavily infested and this population will increase if the rats are not destroyed. Good sanitation is the place to start, along with a poison or exterminating program. Rats destroy large amounts of feed and grain, and are also a menace to the health of livestock and poultry. Rodents increase the cost of production because they compete with domestic animals for survival. Good management demands eradicating the maximum number of rats and mice.

TO VENTILATE BUILDINGS

Warmer weather has arrived when many barns are closed too tightly for the comfort of the animals. Some tight barns may need exhaust fans or a thermostat in order to get the proper air movement. Cattle that are confined should be provided with large fans or with cross-ventilation from doors and windows. The manure pack at this time of the year will call for more ventilation in an enclosed building. In cooler weather, condensation on windows, walls, and ceilings is an indication of poor ventilation. Animal comfort is needed for peak efficiency.

Farm Calendar

Monday, March 11

7:30 p.m. - Swine Producers meeting, Farm and Home Center, Lancaster.

7:30 p.m. - Glen Rock-Loganville 4-H tractor club meeting, C. Harry Miller's, Glen Rock RD2.

7:30 p.m. - Horsing-Around 4-H horse club meeting, J. C. Building at Our Gang Club, East Prospect.

7:30 p.m. - Central York 4-H tractor club, Clair Worley's, 3175 W. Market St., York.

Manheim Young Farmer monthly meeting. Topic: Partnerships and Purchase Agreements.

8:00 p.m. - Fulton Grange meeting, Grange Hall, Oakryn.

Tuesday, March 12

9 a.m. - 3:30 p.m. - Primitive Frame Loom Weaving workshop, Farm and Home Center, Lancaster.

9:30 - 12 noon - 4-H Leader Quality Clothing workshop, York Co. 4-H Center.

BANVEL®
Available At
Royster Farm Service Center
500 Running Pump Road, Lancaster, Pa
Phone 299-2541

BANVEL® AVAILABLE AT
P. L ROHRER & BRO., INC.
Smoketown, Pa. Ph. 397-3539

THIS IS THE YEAR THAT IS!

The year to make sure you "milk" every last cent out of the small grain price bonanza.

You can't afford weeds! Especially the tough, deep-rooted ones Banvel® herbicide gets.

If you've been putting up with tough weeds that other herbicides fail to control, this is the year to put Banvel herbicide into your operation and get the extra bushels you've been losing.

Weeds such as wild buckwheat, smartweed, knawel, mayweed, corn chamomile, corn and cow cockle, dog fennel, gromwells, have gradually become major pests because other herbicides encouraged their spread in two ways. First, by controlling other less resistant weeds, they removed the natural competition to those they did not control; and secondly, they failed to control the tough ones. BANVEL does an excellent job of controlling those mentioned above. BANVEL herbicide can also be tank-mixed with either MCPA or 2,4-D to give you even wider spectrum control.

On fall-seeded wheat, spray BANVEL immediately after winter dormancy, and before wheat begins to joint.

Whether you apply BANVEL yourself, or use a custom operator, be sure that it is applied *strictly* according to the BANVEL label directions. Doing so will both save and make you money.

Now all you need is a good growing season. Good luck!

NOTE: Before using any pesticide, read the label.

BANVEL® from VELSICOL®

Velsicol Chemical Corporation
341 East Ohio Street
Chicago, Illinois 60611

Harris Carter, left, and Willis Rohrer both spoke Tuesday night at P. L. Rohrer's annual appreciation banquet for farmer-customers. Carter is Ortho Chemical's manager of national fertilizer sales, while Rohrer is president of the local firm.

Expert Discusses Fertilizer Shortage At Rohrer Banquet

"Many of us don't realize that the U.S. is a bigger factor in the world food supply than the Mideast is in the world oil supply," Harris Carter told a group of 75 farmers Monday night at the Meadow Hills Dining Hall. Carter is national manager for Ortho Chemical's fertilizer division, and he was speaking at the annual P. L. Rohrer appreciation banquet.

Carter said agricultural exports will do a great deal to solve this country's balance of payments problem, especially as other countries get more money to pay for farm products. Government policy has shifted from an emphasis on price supports and surplus storage to an all-out production policy. This will help increase farm income in this country, Carter said, but it will also aggravate some problems.

One of those problems is fertilizer availability. "Fertilizer accounts for 30 percent of our agricultural productivity," Carter commented. "Whatever can be said about the condition of agriculture can be said about the condition of the fertilizer industry. Fertilizer is the key input of American agriculture."

The product that has done so much for farmers has been taken for granted, Carter said. "At one time, we had an oversupply of product, and seemingly unlimited quantities. Prices were driven down to the point where it became economically unwise to invest any more capital in new production capacity. The industry stopped expanding for while, and now we find ourselves with too little productive ability.'" Carter said the fertilizer shortage should clear up in about three years as new plants come on stream.

Natural gas, the primary raw material for the manufacture of fertilizer is a source of great concern to industry leaders, Carter commented. He said great quantities of natural gas are used for the generation of electric power. This fact sometimes makes it difficult for fertilizer manufacturers to get their needed supplies.

DOEBLER'S HYBRIDS Grown For PENNSYLVANIA

We here at Doeblers are excited about a new kind of hybrid corn called WAXY. According to initial research data, WAXY corn shows better feeding efficiency (about 10%) when utilized by beef cattle. (Research data from the University of Illinois and others upon request.)

Doeblers have two varieties available for Spring planting -- 64X Waxy, 103 days and 73X Waxy, 108 days. In both yield and appearance these two corns compare favorably with regular corn hybrids.

Try a limited acreage of WAXYS this Spring, "see for yourself" how they perform and then look for that "easy" 10% increase in efficiency.

Change Feed to Fight Phosphorus Shortage

Secretary of Agriculture Earl L. Butz said this week that current shortage of phosphorus supplements used in livestock and poultry feed could be eased considerably if the livestock and feed industry would reduce phosphorus use to levels recommended by the National Research Council.

The Secretary made this observation in announcing that a 17-man Task Force on Phosphorus Requirements of Livestock and Poultry met this week to determine whether further reductions in phosphorus supplements can safely be made.

The Task Force was set up by the National Research Council of the National Academy of Sciences. The Task Force is comprised of members of the Council's Animal Nutrition Committee and livestock experts of the Department of Agriculture.

"We are confident that feeding of phosphates can be reduced to levels no higher than the current recommendations of the National Research Council of the National Academy of Sciences without any adverse affect on the animals," said Secretary Butz. "Further, we think this level of usage would go a long way toward balancing out the current shortage of phosphorus."

Chairman of the Task Force is Dr. T. J. Cunha, of the University of Florida, who is chairman of the Committee on Animal Nutrition of the National Academy of Sciences.

The current shortage, the Secretary emphasized, amounted to an estimated 300,000 tons of dicalcium phosphate equivalent, or about 20 percent of the total U.S. need of 1,600,00 tons annually. The shortage is anticipated to last from 6 months to 18 months and perhaps longer.

Secretary Butz said a working session will be held with industry representatives in the near future to discuss recommendations in the report being prepared by the Task Force. In addition, he said the Department's Energy Office will be directed to make copies of the full report available to the Cooperative State Extension Service offices as soon as possible and to hold meetings with industry to implement necessary action.

The Secretary cited a number of causes for the tight phosphorus situation: Demand for phosphorus has increased five fold in the past 25 years, and production of late has not been able to keep up. Some of the phosphoric acid normally used to produce feed phosphates has been diverted to fertilizer production recently. Imports of Curacao phosphate rock have been cut in half because of more profitable markets in other countries. And recent reductions in fish meal imports are the equivalent of 60,000 tons of dicalcium phosphate. Shortages of gas, oil, electricity, rail cars, and other transportation have also affected production.

The Secretary said that in addition to the recommendation that use of supplemental phosphorus not exceed NRC requirements during the shortage, the Task Force is considering the validity of such measures as:

– Matching the use of various phosphate supplements to the particular class of animal at different stages of their life cycle. Phosphorus supplements might be reduced in the diets of finishing-slaughter animals, laying hens, and mature livestock not being utilized for reproduction or lactation.

– Mounting an immediate educational effort by the Federal government, research scientists, and Cooperative State Extension Services, and the feed, livestock and poultry industry to counter the effects of a phosphorus shortage on production.

USDA to Determine '75 Wheat Allotment

The U.S. Department of Agriculture called for public comment on the proposed size of the 1975 national wheat allotment.

Under current legislation, the allotment would be used to determine what payments should be made to wheat growers if the market price for wheat falls below $2.05 a bushel. Currently, wheat is selling for about $6 a bushel The allotment in no way contrains, nor sets a limit, on the amount of wheat that may be planted.

Legislation provides that the Secretary of Agriculture proclaim a 1975 national wheat acreage allotment not later than April 15, 1974. The national allotment shall be the number of acres which the Secretary determines on the basis of the estimated national average yield will produce the quantity (less imports) that he estimates will be used domestically and for export during the marketing year for the crop.

If the Secretary determines that carryover stocks are excessive or an increase in stocks is needed to assure a desirable carryover, he may adjust the allotment by the amount he determines will accomplish the desired decrease or increase in carryover stocks.

Prior to determining the 1975 national allotment, consideration will be given to data, views and recommendations relative to estimates of the national yield, domestic utilization of wheat, exports, carryover and other data pertinent to this determination which are submitted in writing to the Director, Grain Division, Agricultural Stabilization and Conservation Service, U. S. Department of Agriculture, Washington, D. C. 20250. Submissions must be received by the director not later than 30 days after publication of this announcement in the Federal Register. These comments will be available for public inspection in the director's office.

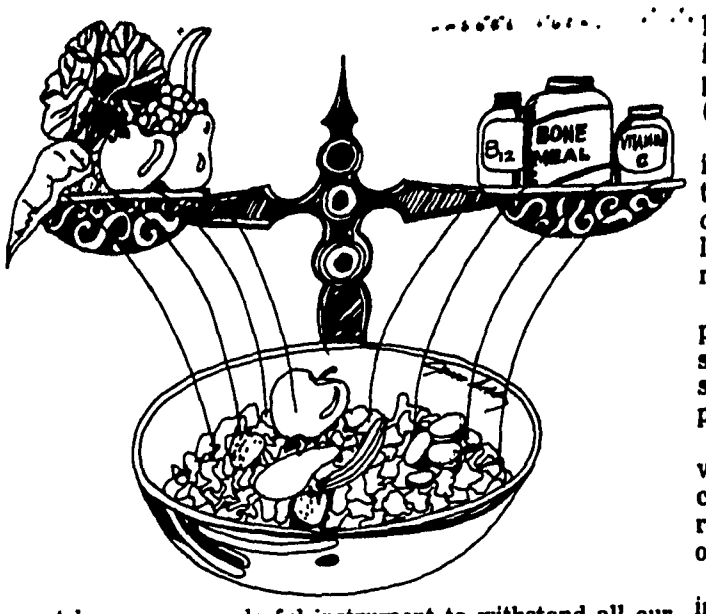
HEALTH FOODS WORK TOGETHER FOR BEST RESULTS

Interest in vitamins and other health foods often runs in spurts, with public attention focused first on one, then another nutrient. Those who jump from one vitamin bandwagon to another, however, are missing out on the kind of long-range benefits produced when vitamins and health foods are allowed to work together as a team.

One of the best examples of this kind of cooperation among nutrients was provided by Albert Szent-Gyorgi, Nobel Prize-winning scientist. He discovered that vitamin C is even more effective as a defense against colds when consumed with wheat germ. Investigating further, he found that through a complex series of reactions, substances called glucosides in wheat germ were able to make vitamin C more effective in the human body.

Dr. Szent-Gyorgi has formed the habit of starting every day with a breakfast of sliced banana, over which he pours about two ounces of wheat germ, adding milk. He also drinks tea to which he adds about a gram (1,000 milligrams) of vitamin C, instead of lemon.

"I always felt that not enough use was made of ascorbic acid (vitamin C)," he writes in his book, "The Living State." "Is our body such a poor mechanism that it has to break down every so often with a cold or other ailment? Or do we abuse our body and feed it so poorly that its breakdown is comparable to the breakdown of an unlubricated engine? I am often shocked at the eating habits of people . . . Our body



must be a very wonderful instrument to withstand all our insults."

To Dr. Szent-Gyorgi, the wheat germ-vitamin C combination makes perfect sense. "If one is deficient in two factors," he says, "administration of one of them may help to some extent, while full benefit may be derived only by taking the two in combination."

Another serendipity effect of combining health foods was reported recently by Mary Ann Crenshaw, author of "The Natural Way to Beauty". She was able to lose 12 pounds in two weeks on a low-calorie diet, aided by four ingredients: lecithin (a soybean oil derivative), kelp, vitamin B6, and cider vinegar.

What's more, her formula has worked for others. "So far, the mysterious mixture of these four ingredients has never failed to take off pounds, as long as a low-calorie regimen was strictly adhered to," writes Ms. Crenshaw.

Research chemist Jacobus Rinse mixes up a nutrient combination in his breakfast bowl that he claims works wonders for his heart condition. "My hypothesis was that there was a deficiency in my diet," says Rinse. "Therefore, food must contain everything in adequate quantities and should be varied as much as possible."

He has put together a mixture of one tablespoon each of lecithin, yeast, and raw wheat germ, and one teaspoon of bone meal. Then he mixes together in a bowl two tablespoons of this mixture, with one tablespoon of raw sugar and one tablespoon of safflower oil. He dissolves this mixture in milk, and adds yogurt to improve the consistency. He adds cold cereal, or else mixes it with hot cereal such as oatmeal. He also takes vitamin C, vitamin E, and one multivitamin-mineral tablet daily with his meal.

"After three months on this breakfast, all symptoms of angina pectoris, even after exercising, disappeared," Rinse noted in the scientific journal, "American Laboratory". Today there are several thousand people in Holland, England, Belgium and the U.S. who are using Rinse's morning feed.

Here are some other examples of nutrient combinations that provide extra benefits:

- Bone meal and vitamin D. Bone meal tablets are an excellent source of calcium that the body needs for healthy bones, teeth, nerves and muscles. But without another essential material – vitamin D – calcium is a lame duck. Deprived of vitamin D, we can't absorb calcium through the intestinal wall, and it can't be deposited in the bones. The problem can be solved by taking a vitamin D capsule (derived from fish liver oils) along with the bone meal.

- Vitamin A and protein. Without a sufficient vitamin A intake the liver can't synthesize protein properly, according to T. R. Varnell of the Division of Animal Science, University of Wyoming. Fish liver oil capsules rich in vitamin A are the logical solution as an accompaniment to our high-protein meals.

- Desiccated liver and vitamin C. For years, health-minded people have been taking desiccated liver tablets as a rich source of natural iron. Scientists now know that iron is absorbed best from the intestinal tract when vitamin C is also present.

- Vitamins C and E. Combined in the diet, those two vitamins show promise of preventing sunlight-induced skin cancer. Good results with laboratory animals were reported recently by two dermatology researchers at Baylor College of Medicine, Texas.

Not all combinations of substances are advantageous. For instance, aspirin will completely inhibit the absorption of vitamin C by the body's white blood cells. That disturbing fact was reported recently by researchers at the University of Dublin in Ireland.

So to get the most from the nutrients you consume, consider the company they keep.

xxx

What natural food supplements should you consider including in your daily diet? "The Prevention System for Better Health" is a 44-page guide to vitamins and health foods. It's available for 50 cents from Robert Rodale, Organic Living, in care of this newspaper. Please ask for the booklet by name when ordering, and allow four weeks for delivery.

Guernsey Breeders Plan Tour

The Lancaster County Guernsey Breeders are planning a tour to Lebanon and Dauphin counties on Monday, March 18, 1974. We are planning to go to the top producing Guernsey herd in Lebanon County, the herd of Warren Bucher's. The herd is housed in a stanchion barn. We will also visit Ja Mar Farms operated by Jake & Robert Smith of Palmyra, where we will see a judging operation and Guernsey cows in comfort stalls.

We will also visit Founder's Hall and Chocolate World in Hershey, and see the new free stall barns.

Bring your own box lunch. Plans are to eat on the bus while traveling. The cost of the trip is $3.50 per person. The bus will be leaving the Acme Store parking lot in Quarryville at 8:00 a.m. The next stop will be Ray Witmer's at 8:15 a.m. Next stop will be at Hat & Gavel Auction parking lot along 501 north of Lititz at 9:00 a.m. We plan on having the bus return to Quarryville by 4:30 p.m.

Plan to bring your wife or friends along for an educational and enjoyable day.

Contact someone on the tour committee by March 16, where you plan to meet the bus; Jesse Balmer 626-8055, Robert Rohrer 687-7424, or J. Scott Wolff 786-2336.

Pre-emerge tank-mix combination...

BANVEL®

+

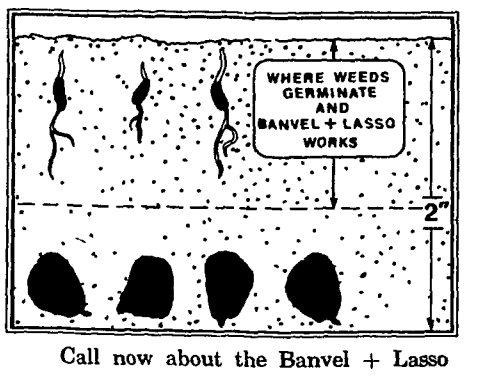
LASSO®*

can give you "near perfect" control** of both broadleaf and grassy weeds in corn.

Proof is in! Hundreds of corn producers "built" their own Banvel + Lasso 4EC tank mix in 1971, 1972 and 1973 It's applied just after planting, timed to destroy weed seedlings, when corn needs protection most

Control? Over and over again, "near perfect" On many tests of Banvel + Lasso the percentage of control ranged between 90% and 95%. Banvel + Lasso killed broadleafs, vines, and took out grasses before weeds could develop enough to compete with corn

Banvel + Lasso needs no incorporation. No carryover No residue problem No brittleness caused in corn



Call now about the Banvel + Lasso combination Remember, the "near perfect" herbicide can be the one you build . with Banvel . from Velsicol.

* Presently registered for use in the states of Illinois Indiana Iowa Minnesota Missouri and Wisconsin only Lasso is a registered trademark of Monsanto Company

**90% or better control of both grassy and broadleaf weeds based on field tests in eight states during 1971, 1972 and 1973

From Local Ag Teachers:

Thoughts in Passing

Pond Problems

The article this week was prepared by Ronald J. Althoff, teacher of agriculture at Solanco High School.

Have you looked at your farm pond lately? Are you starting to encounter problems that you never expected?

Management of a pond after it is built is just as important as the construction planning. Aquatic plants present problems for most pond owners. Like weeds in a garden, undesirable aquatic plants must be dealt with in a continuous program.

Some of the problems can often be alleviated by deepening the edges of a pond to three feet with 3:1 side slopes. Cattail and bulrush along pond edges can be pulled by hand when it first appears. Vegetation on pond banks should be mowed where practical. Keeping banks free of dense growth will also help control snakes.

Fertilizing to keep the water cloudy with plankton may help prevent plant growth. The plankton will also make excellent food for any fish in the pond.

Chemicals are available for weed control in ponds, but anyone using such chemicals in a body of water must have a permit and follow the procedures established by Pennsylvania Fish Commission and the Pennsylvania Department of Health.

Muskrat Damage

The best insurance against muskrat damage is a properly designed pond. There is little danger of leaks in dams with adequate top widths because muskrats usually will not burrow completely through. The top of the dam should be at least six feet wide.

Most likely though, even the best designed pond will have muskrats that eventually become a nuisance to the owner. Riprapping the shoreline with large gravel or small stones may offer some protection. These materials should be placed 3 to 4 inches thick and should extend from at least one foot above the normal water level to at least 3 feet below it.

Muskrat may also be trapped or killed for control. However, poisons may not legally be used in muskrat control.

Muddy Water

The causes of muddy water in a pond could be almost anything from erosion to livestock wading in the pond. The cause should be corrected before attempting any treatment. Agricultural limestone (calcium carbonate) or Agriculture gypsum may be broadcast at the note of 1,000 pound per surface acre of water to help clear muddy pond water.

With a little management and care, a pond can be a beautiful and valuable asset to a farm. If neglected, a pond can become an ugly mess.

Ronald J. Althoff

Pa. Bull Captures National Honors

A Pennsylvania bull, bred and raised in Somerset County, has capped a successful tour of the leading livestock expositions by winning the 1974 national grand championship of his breed in Denver, Colorado.

"SHF Sir Royal Sam 1st," a two-year-old Charolais, added his latest honor at the 1974 National Western Livestock Exposition after a string of three grand championships and a reserve grand championship in his only four previous outings in the show ring.

"Sam" was born into the herd of John M. Dovey, Stone Hollow Farm, Davidsville, but has been touring the livestock show circuit under the colors of Pennsylvania State University, whose herdsmen groom and show the one-ton beauty.

Dovey has since assigned one-third interest in "Sam" to PSU and sold one-third to the Royal Charolais Co., Youngwood, Pa.

In addition to the near-perfect record in the five leading livestock expositions in the nation, "Sam" is also unique in that he is a smooth polled Charolais. Smooth polled means the bull neither has horns nor the bone-like stubs that still remain in many polled (horn-less) cattle. "Sam" is the first polled bull to be named national grand champion of the Charolais breed.

Gov. Milton J. Shapp and Secretary of Agriculture, in separate letters to Dovey, congratulated him on the singular achievement and also for the prestige and honor it brought to the livestock industry of Pennsylvania.

The other grand championships were won at the Chicago International Livestock Exposition, the Ohio State Fair and Keystone International Livestock Exposition, Harrisburg. The big bull had to settle for a reserve or runner-up grand championship at the American Royal Livestock Exposition, Kansas City.

Hoffman FARM SEEDS

SERVICE You Can Measure in Greater Crop Profits

VARIETY RESEARCH & SEED TESTING...

At Hoffman we believe research begins to mean something when it finds practical application on the farm in the form of higher crop yields. We keep in close touch with private and public plant breeders . . . often check their work in our own test plots and on-the-farm trials. The object: to bring you new varieties as soon as results are proved.

PLANNING BETTER PAYING CROPS...

Hoffman service includes a lot more than prompt delivery and the correct order handling. More than 400 Hoffman Seed Men, located in key farming areas, keep up to date on local soil conditions and crop results. They're up on new management ideas . . . ready to help you solve your crop problems.

SUPERIOR SEED QUALITY STANDARDS

As science discovers new and better ways of insuring seed quality, Hoffman applies those higher standards . . . in its own seed testing laboratory . . . in the production fields where seeds are grown . . . in the warehouse where they are processed and stored.

There are probably two key reasons why more farmers switch to Hoffman Seeds (about 3000 last year)—Superior seed performance and broad, dependable service.

Princep keeps panicum and crabgrass out of your corn.

Up to harvest.

Even in a wet year.
That's one reason why Princep® teams up so naturally with AAtrex®.
Of course, there are other herbicides you can use with your AAtrex.
But Princep assures you control of fall panicum and crabgrass. Right up to harvest.

Essential if you expect to grow good, clean corn. This year or any year.

Princep also teams up with AAtrex to stop most annual grasses and tough broadleafs Up to harvest.

Another thing. Mix Princep in with your AAtrex, and you can spray when you find the time. Earlier than any other herbicide combination. Before planting, at planting or afterwards. But before weeds and corn come up. In a weed 'n feed program if you choose.

You won't have problems rotating to soybeans, either. Just follow the label.

Here's something else about Princep that'll interest you. Now it comes in liquid form. New Princep 4L.

Making it a perfect match for AAtrex 4L. Easy to measure.
Easy to mix.

If you have any questions, please let us know. Agricultural Division, CIBA-GEIGY Corporation, P.O. Box 11422, Greensboro, N C. 27409.

Goats

(Continued From Page 1)

which she keeps for breeding.

Artificial insemination is feasible with goats, but there's not much of a demand for it, and not much service, either.

One problem with goats, in Mrs. Jacobs view, is that there has never been any real veterinary research done on the animals. Nothing, at any rate, comparable to the massive efforts on cows, hogs and horses. Some work is being done, however, at the New Bolton Research Center. Pneumonia is a big problem in goats, and they can also contract mastitis.

Because of her limited acreage, Mrs. Jacobs buys all her feed except for some hay which she grows. She feeds corn, oats and soybean meal, and barley whenever she can because the animals favor barley. Hay is available free choice. A lot of hay is wasted by goats because they are very particular about the hay they eat. In spite of popular legend to the contrary, goats are particular about everything they eat. They like a rough, sweet feed, and if there's something in the feed trough they don't like, they'll eat around it. "Cows slurp and gulp and just swallow everything," Mrs. Jacobs said. "Goats kind of nibble at their feed. I guess you could say they have better table manners. They certainly don't get hardware disease like cows."

Born just a few hours before this photo was taken, this kid belongs to Mrs. Margaret Jacobs, one of Chester County's premiere dairy goat farmers.

Shagbark Erica's Eric, top, and Diamond Sunshine Citation are two of the prize bucks in the Jacobs herd.

The growing trend towards backyard farming augurs well for goats, Mrs. Jacobs feels. "We've sold quite a few goats to people who are just getting into growing their own food. They're planting fruit trees and berry bushes, and they're buying goats for milk."

Thought For Food

Broccoli With Mustard Hollandaise Sauce

Wash 1 bunch (1½ lbs) fresh broccoli and trim tough portion of stem ends, but do not remove stems and leaves Make lengthwise gashes in stems almost to the flowerets, if they are more than ½ inch in diameter or split the large stalks so they will be tender by the time the flowerets are cooked Place in a saucepan with 1 teaspoon salt and 1-inch of boiling water in the saucepan Bring to boiling point, uncovered and cook five minutes Cover and cook 10 to 15 minutes or until broccoli is crisp tender Drain if necessary Serve with Mustard Hollandaise Sauce Combine in the top part of a double boiler 2 egg yolks 1½ teaspoons powdered mustard, 1 tablespoon lemon juice, ¼ teaspoon salt, ⅛ teaspoon ground red pepper and 2 tablespoons heavy cream Cook slowly over hot (not boiling) water until mixture begins to thicken, about 3 minutes, beating constantly with a wire whip or rotary beater Add ⅓ cup butter or margarine, 1 tablespoon at a time, beating constantly Serve hot over broccoli or other cooked vegetables Yields 5 to 6 portions

Two black aces and two black eights is known as "The Dead Man's Hand" because that was the hand which Wild Bill Hickok was holding when he was shot.

Tobacco Growers Vote "No" on Quotas

Lancaster County farmers voted five-to-one against marketing quotas for Type 41 tobacco in a referendum held here February 25 through March 1. The results of the balloting surprised no one. Local farmers have always voted against quotas since the first referendum was held in the early 1940's.

The latest ban on quotas will be in effect for the 1974 through 1976 crops. Another referendum will be held in 1976.

Altogether, there are 3090 eligible voters in the county. Of these, 687 voted against quotas and 126 voted in favor. Fourteen ballots were challenged and disallowed by the County ASC committee on determination that the voters were ineligible. Also not counted were 10 ballots postmarked after the March 1 deadline, and 44 that did not have the required voter's signature.

The vote against marketing quotas means there will be no acreage controls and no price support level on Type 41 tobacco for the next three years.

Young Farmers and Money

"We've got to find ways of making risk capital available for young farmers who don't have the equity for a normally sound loan. We need the answer if we're going to get younger men into farming. Because if we don't get younger men, we're going to have trouble maintaining the family farm."

Speaking was E. G. Fouse, president of the Federal Land Bank and Federal Intermediate Credit Bank of Baltimore. Fouse was interviewed by Lancaster Farming on Tuesday at the Host Farm, where he was attending the 1974 conference of general managers and directors of the Farm Credit District of Baltimore. The district includes all Federal Land Banks and Production Credit Associations in Pennsylvania, Delaware, New Jersey, Maryland, West Virginia, Virginia and Puerto Rico.

Fouse said he didn't forsee any shortage of credit for present and potential customers of the Farm Credit Service, but did say that loans as always will be subject to a farmer's equity, management expertise and farming program.

Farmers in the Northeast are experiencing tremendous rises in land prices, Fouse commented, a factor which enters into any lender's decision on whether or not to advance the funds for a farm purchase. "Sometimes, the land is simply priced too high for farming. You just can't pay three or four thousand dollars an acre for farmland and expect to farm it at a good profit."

Family farm operations will continue strong in the Northeast as well as the rest of the country, Fouse said, partly because no other farming system can match the family farm for efficiency.

PennAg's Clark Assails Rail Plan

PennAg Critical of Rail Reorganization Proposal

Details of PennAg Industries Association's criticism of the Northeast Rail Reorganization Proposal were given Friday by the Association's President, Ned L. Clark of Shamokin at an I.C.C. hearing in Avoca, Penn.

Clark was commenting on the first step proposal by the U. S. Secretary of Transportation, outlining that department's recommendation for reorganizing rail service in the northeastern United States, a move which will eliminate 1,450 miles or 18 percent of Pennsylvania tracks. Clark stated that even though PennAg is critical of the proposal, he hopes the testimony "will contribute to the vast knowledge needed to develop the best final system plan".

PennAg is a state-wide trade association of agribusiness firms who buy from and sell to farmers. Its members are greatly concerned over the plight of rail transportation because of their dependence on it. An association survey made several years ago indicated the 25 percent responding to the study used 27,248 rail cars involving 1,206,898 tons of feeds, grains, fertilizer, etc. annually.

"Most of these firms are located near farms and as such are in rural areas, many on branch lines," Clark said.

A recent study of the Secretary's report indicates that up to 163 agribusiness firms or 15 percent of the Pennsylvania total could lose rail serivce. Clark estimates that 84 percent of the feed ingredients and 90 percent of the fertilizer ingredients processed in Pennsylvania are shipped in by rail.

Clark's sharpest criticism of the Secretary's Plan was aimed at what he called its "General Bullmoose Philosophy - what's good for the railroads is good for the country." According to Clark, the Secretary's Plan is too rigid.

"His recommendations for continued service are based on a formula which assumes that every mile of track must be profitable and to be profitable, each mile must carry so many cars. This formula approach does not take into account local conditions or special industries, future community or business growth. We know of two brand new feed mills built with the expectation of continued rail service which now have their lines slated for abandonment.

"This formula being proposed by the Secretary of Transportation only covers one criteria of continued rail service which the Act prescribed. He ignored whehter alternate modes of transportation were available, what the relative social, economic and environmental costs were, and the effect on competition.

"With decreased competition among agricultural processors, we are concerned that consumrs in the cities will be paying a higher price for their food because of a short-sighted economic plan," Clark concluded.

Pictured above are Edgar Greenleaf, left, of Kirkwood and Martin Greenleaf Jr., Oxford RD1 with one of the tractors driven by them in the recent Pennsylvania State tractor pulling contests. Also shown are several trophies they have won. Ed recently received a trophy for State Points Champion, 12,000 pound super stock class, with a Case 1370 tractor. Marty recently received State Championship trophy in the 12,000 pound stock tractor class with the 1070 Case shown above. Marty compiled more total points in any one class than any other tractor in Pennsylvania, with an average 9.5 points per pull, of a possible 10 points.

ERS Claims Cropland not Affected by Urbanization

Rapid urbanization has had little impact on America's total amount of cropland even though more than 3.5 million cropland acres were lost to urban sprawl in the last ten years. This seeming paradox is explained in a report issued by the U. S. Department of Agriculture's Economic Research Service (ERS).

The 350,000 acres of cropland lost each year to urbanization represents only about one-tenth of one percent of total U. S. cropland. And for every cropland acre urbanized, U. S. farmers added about three acres of productive new land in other areas through irrigation, drainage, or clearing, according to the report. While urbanization of cropped acres may seem drastic in some areas, ERS researchers conclude that, nationally, it has had little effect on the total supply of cropland.

Recent concern over rapid growth of urban areas and its impact on U. S. food-producing acres prompted the study, focusing on "Standard Metropolitan Statistical Areas" (SMSA) where much agricultural production takes place despite urban concentrations of 50,000 or more people. Over two-thirds of the U.S. population live in the 459 counties that were included in the 242 SMSA's studied.

SMSA's are growing fast. Over 80 percent of the U. S. population growth in the 1960's came in SMSA's. There were nearly a third more counties included among the 1970 SMSA's than had been listed in 1960. The total urban area in the SMSA's studied increased from 18 million acres in 1960 to 25 million acres in 1970; about half of this increase came from cropland.

Much farming is still done in the city's shadow. Even though less than a sixth of U. S. cropland is in SMSA's, they produce more than a fifth of U. S. farm output. Vegetable and fruit production is particularly concentrated near cities.

Copies of the report, "Farming in the City's Shadow," AER 250, are available on request by telephone: (202) 447-7255. Or send a postcard to Office of Communication, U. S. Department of Agriculture, Washington, D. C. 20250. Please include your zipcode with your full address.

Cost of Earning Income Usually A Tax Deduction

(This is the fourth in a series of five articles on 1973 Federal Income Tax returns prepared by the Pennsylvania Institute of Certified Public Accountants as a public service.)

Traditionally the policy has been that a taxpayer can deduct from his income the costs incurred in obtaining that income. This is reflected in many varied deductions or exemptions permitted on tax returns.

The ordianry and necessary costs of business travel and entertainment are deductible, for example, if one is not reimbursed for these by an employer. All you have to be able to prove to Uncle Sam is that the expenses were directly related to the earning of income.

One expense connected with the earning of income that cannot be deducted is the cost of getting to and from work, except in the case of a worker who must carry heavy or bulky tools or materials to and from the job, in which case he might be able to deduct car costs. Even there, though, the car costs are not deductible if the individual would use his car anyhow, even if he didn't have a load to carry.

A working taxpayer who incurs expenses for the care of young children in order to be able to go to work can in some cases deduct those costs.

Under certain conditions, if one has moved his place of residence because of a change in his place of work the costs of making the move are deductible.

Professional fees paid to lawyers, brokers or CPAs for guidance or assistance in such fields as investments and taxes can be deducted, along with the cost of a safety deposit box for the protection of securities, as well as subscriptions to investment advice services, financial publications, etc. All are considered as having contributed to obtaining income or managing income-producing property.

If a taxpayer owns income-producing property -- a second house, for example -- he can deduct the costs of maintaining and renting it out, along with payments for interest and taxes, which are deductible in any case. However, if he himself, lives in the second house part of the year, expenses other than interest and taxes may be deductible only up to the amount of income the property produces.

Even gamblers (who declare their gambling winnings on tax returns) are permitted to deduct the costs of earning those incomes. They can deduct their losses, up to the amount they have won.

County, SCS Retain Conservation Planner

The U.S. Soil Conservation Service and the Lancaster County Conservation District entered into an agreement Wednesday night to provide for the joint hiring of a soil scientist to aid primarily in preparing conservation plans of county farms.

Orval Bass, district conservationist, explained there is presently a backlog of 300 applications for agricultural conservation plans.

This is a direct result of the Clean Streams Law which requires all Pennsylvania farms to have a conservation plan implemented by July 1, 1977.

In addition, explained Bass, the local SCS staff has been cut from four persons to two, including Bass. The other conservation technician is planning to retire within a couple of months.

It is the Soil Conservation Service that is the local working arm of the District. SCS employees, following District guidelines, prepare the various conservation plans.

The agreement signed Wednesday night provides for the county to pay 51 per cent of the cost of the additional man with the SCS picking up the tab for the remaining 49 per cent.

The new employe, Dale Burns, who is currently working for the SCS in Bellefonte, will start his duties here on March 18.

The district board also laid the groundwork for obtaining a replacement for the retiring worker, Abner Houseknecht. A job description was approved by the board which will allow the county to rehire Houseknecht upon his retirement from the SCS. His functions will remain the same.

This will then put the number of conservation workers at three. It is then expected that the SCS will replace Houseknecht with another worker bringing the staff back up to four.

Paul Paes, chairman of the Lancaster County Commissioners, looks on as Aaron Stauffer, left, and James Olson sign an agreement which will add an additional soil scientist to the local Soil and Conservation Service staff. The new man will be working primarily with farmers in the preparation of farm conservation plans. Stauffer is chairman of the Lancaster County Conservation District, while Olson is the SCS district director responsible for Lancaster and 17 other counties in southeastern Pennsylvania.

The district should receive a little additional help, too, as it has agreed to participate in a career elective program with Donegal High School. The program would provide for a student interested in conservation to work with the SCS during May instead of attending regular classes.

Upon the encouragement of Afton Schadel, chief of the division of soil research and erosion control of the state Department of Environmental Resources, the board also agreed to accept inspection responsibilities formerly handled by state workers when they were available.

As it iwas explained, the district presently does nearly all of the inspection work anyway. Henry Hackman, executive assistant, agreed to handle the inspection duties.

Under this arrangement, DER would not come to the county for erosion and sedimentary control problems unless called in as a special request by Hackman.

"I think you can correct 80 per cent of the problems just by letting the person know he has a problem," explained Schadel.

In other business, the board also agreed to sponsor another plowing contest and Conservation Field Day. The date and location will be announced later.

Rumor has it that Queen Elizabeth of England gambled, or rather didn't gamble, with loaded dice!

R.D.4, Lititz Ph. 626-4355

Dr. B. P. Anderson, one of the speakers at Lancaster County Dairy Day, used slides to demonstrate some of the points in his talk about mastitis control.

Dairy Day

(Continued From Page 1)

sorry herds in the past few months. They were on straight corn silage diets for months, and there were definite health problems. Some of those cows won't recover for at least a year. Some will never come back completely."

"You can't afford not to feed a balanced diet to cows, and there's just no way out of feeding grain. You cannot cut too many corners without ruining herd health."

Labor is a problem for many dairymen, and Ace noted that one of the best ways to hire help is to pay for technical services that remove some of the burden of decisions from the dairyman's shoulders. He recommended hiring a DHIA tester to keep production records, and an artificial insemination technician to handle AI chores.

Ace also commented on the need for expert care in rearing calves.

Dairy imports, and their effect on the U S. dairy industry, were examined by Jerry Dryer, public relations director for the National Milk Producers Federation in Washington, D.C. Dryer said the federation is a legislative organization working with government agencies in Washington. They represent most of the dairy cooperatives in the country, and 75 percent of the nation's total milk production.

Dryer charged the present administration with trading off the U.S. dairy industry in order to insure an overseas market for American grain. He said in allowing huge quantities of milk powder and cheese to enter this country, domestic milk prices are held artificially low This depresses milk payments to farmers, and, according to Dryer, accounts for declines in national milk production in recent months.

Most of the imported dairy products are used in manufactured products like candy and frozen pizza because, Dryer said, the quality is so low they're not directly marketable as consumer products.

Dr. B. P. Anderson, a Perry County veterinarian, spoke about the income-robbing potential of sub-clinical mastitis. "Clinical mastitis, where a cow is giving bad milk and you can actually see signs of trouble, accounts for only about three percent of the mastitis problems in this state," Anderson said. "Sub-clinical mastitis, the kind you can't see, accounts for the other 97 percent. And that's the kind that costs you money."

Sub-clinical mastitis can cause a $400-$500 drop in yearly production for some cows. At least one kind of mastitis, that caused by the "strep ag" organism, can be completedly eradicated from a herd in 48 hours, Anderson said. Strep ag accounts for about half of the state's mastitis problems.

Anderson cautioned the dairymen against trying to diagnose and treat their herds themselves. He said the services of a qualified veterinarian should be retained, and that the cost of treatment is minimal compared to the savings in milk production.

Proper maintenance of milking machines was another topic Anderson covered.

The storage and disposal of dairy wastes was discussed by Stephen B. Spencer, another Penn State dairy extensionist. He said dairymen should be paying particular attention to the problem of waste disposal because of tightened environmental regulations.

the County Planning Commission. Panel Moderator will be Robert Williams, managing editor of the Pennsylvania Farmer.

Seminar participants will examine the progress being made to amend the Pennsylvania laws on farm land assessments. Last May the voters of Pennsylvania favored the proposal that farm land be assessed on it's productivity, rather than market, value. The seminar is open to the general public without charge.

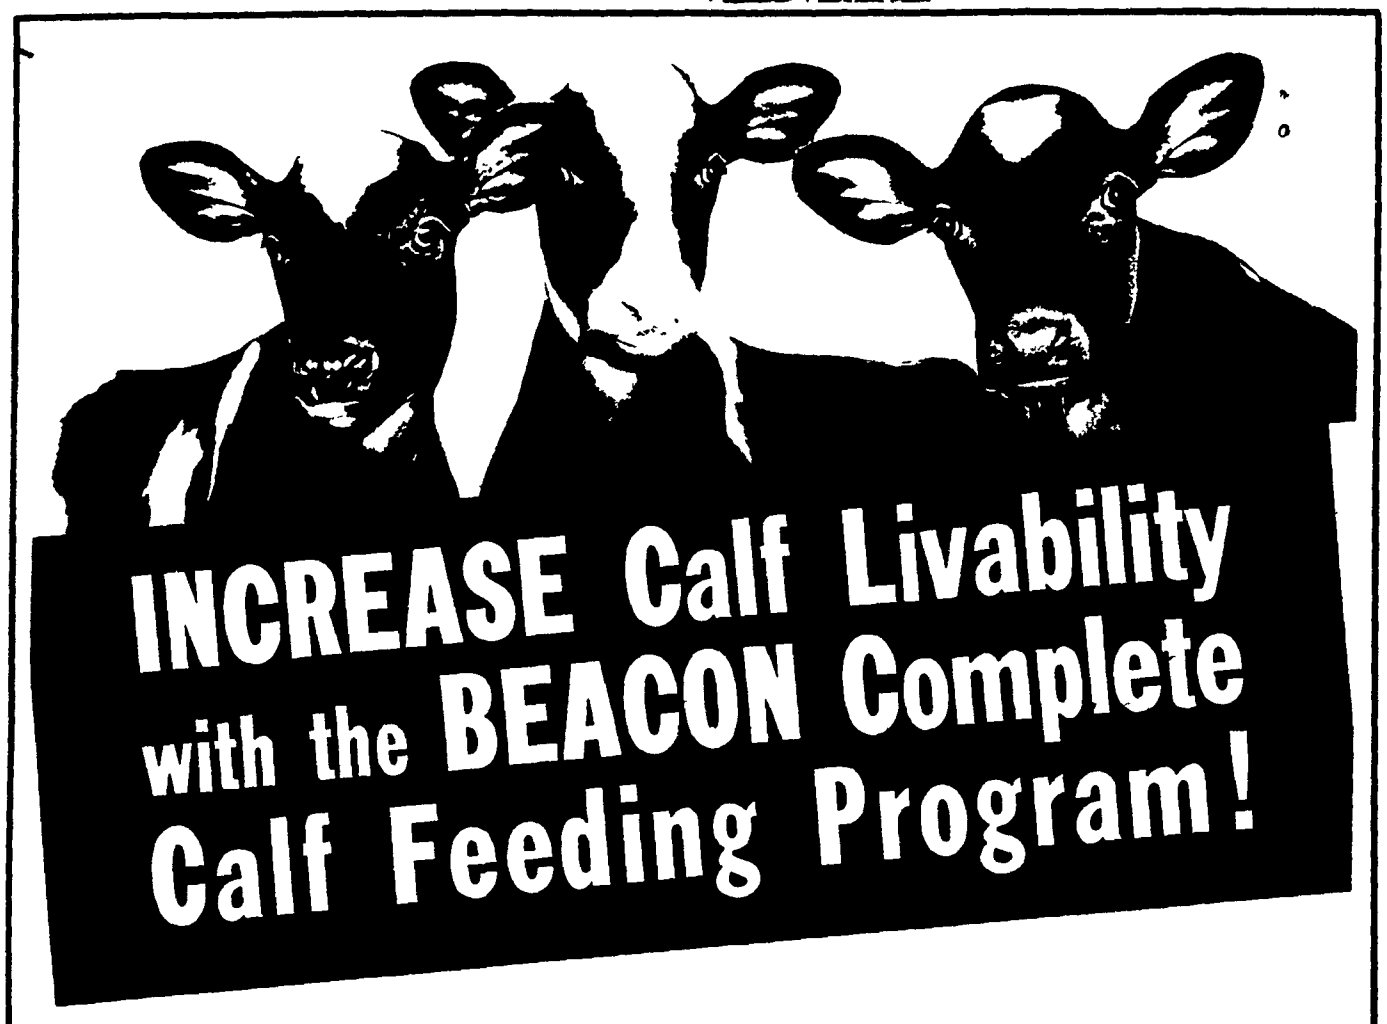
OCT. 9, 1876, FIRST 2-WAY TELEPHONE CONVERSATION.
OCT. 21, 1915, FIRST TRANSATLANTIC TELEPHONE TRANSMISSION.
APRIL 25, 1935, FIRST AROUND THE WORLD TELEPHONE CALL.
TODAY, IT IS SO NATURAL FOR US TO DIAL A FRIEND OR BUSINESS IN OUR OWN COMMUNITY THAT ONE IS APT TO FORGET THAT WE CAN JUST AS EASILY CALL A FRIEND OR BUSINESS ON THE OTHER SIDE OF THE WORLD SIMPLY BY DIALING "O" AND ASKING FOR THE OVERSEAS OPERATOR.



INCREASE Calf Livability with the BEACON Complete Calf Feeding Program!

A recent study by Penn State showed that of 12,000 calves started, more than 18% died in their first 12 months. Beacon's Complete Calf Feeding Program is designed to help you minimize such losses by increasing calf livability.

Be-Co-Nurse milk replacer is one cornerstone of this program. It provides a high level of digestible energy in the form of easily digested lactose (milk sugar) and a high content (20%) of stabilized animal fat.

Beacon Golden Calf Starter is the second foundation stone of the program. It is fortified with vitamins A and D, plus Aureomycin. Partially pelleted, Beacon Golden Calf Starter is a highly palatable grain ration that calves love.

Beacon Calf Power and Beacon Scour Stop-R offer a scour prevention and control program that is highly effective. Calf Power is recommended for calves under undue stress. Scour Stop-R provides a "Feed and Treat" method of combating scours when they actually occur.

Used in your calf rearing program, these Beacon products can help increase your calf livability. Why not call your Beacon Dealer or Beacon Advisor today?

Manheim Young Farmer Group Bestows Awards

Manheim Young Farmers held their annual banquet meeting last Friday night at the Manheim Central High School cafeteria.

Featured speaker for the evening was the Rev. Philip Jones, a Presbyterian minister from Milton, Pa., whose talks are well-known for their inspiring blend of patriotism and theology.

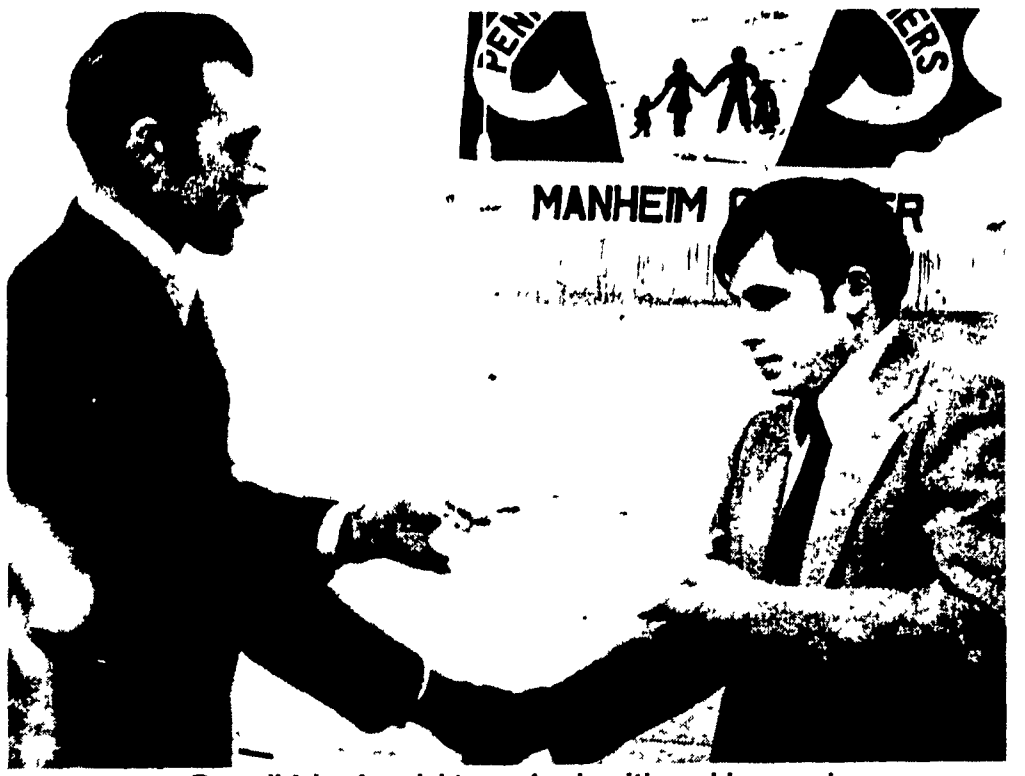
During the meeting, a number of awards were presented to Young Farmers who had performed exceptionally well throughout the year in various categories.

Russell Adamire, the group's vice-president was presented an award for community service. A special award of appreciation was presented to Tim Lichtenwalter, who replaced vo-ag teacher Jess Erway for four months while Erway is taking a year's sabbatical leave.

New member awards went to Jay Bull and Clair Fry. The top dairy herd award went to Earl Landis. Landis had a 48.6 cow herd during the year, and produced an average 15,774 pounds of milk and 596 pounds of fat.

Richard Buckwalter topped the grain corn production award winners with a 173.3-bushel yield. Russell Adamire was second, Marvin Witmer was third and Dale Nolt was fourth.

Adamire topped the corn silage competition with a total production of 40,000 pounds of TDN to the acre. Luke Brubaker was second with 37,000 pounds, and Dale Nolt was third with 35,000.



Russell Adamire, right, received a citizenship award plaque at Friday night's Young Farmer banquet in Manheim. Donald Hershey, awards chairman, made the presentation.

Dispersal

(Continued From Page 1)

this year. Harold Moyer, Collegeville, Pa., paid $7500 for the Hilltop Apollo Ivanhoe daughter. H. D. Matz, New Holland, paid almost as much, $7200, for a four-year-old that milked 19,000 pounds as a three-year-old. Matz' prize was also a Hilltop Apollo Ivanhoe daughter. Both cows are classified Very Good, and both are also contracted to a Carnation Genetics bull stud. Bare said the contract means that the first bull calf out of both cows is automatically worth $2000.

Wife's Role In Roadside Market Operation Cited

The role of the wife in the successful operation of a roadside market was highlighted by Deputy Secretary Jane Alexander, Pennsylvania Department of Agriculture, speaking Thursday before the Pennsylvania-Maryland Roadside Marketing Conference in session at the Sheraton Inn.

Mrs. Alexander is the only woman to serve as a deputy state secretary of agriculture in the United States.

"It's about time that women were recognized as vital in the functioning of a successful roadside market," said Mrs. Alexander. "It's the woman's touch that makes the market hit on all cylinders."

Women are dominating factors in making markets attractive, in arranging displays and in setting the atmosphere of friendliness and service, she said.

In addition, women were becoming more and more important in all kinds of marketing, including promotion, packaging, transportation, distribution and sales, she added.

The Pennsylvania Department of Agriculture is interested in roadside markets, Mrs. Alexander said, because they offer the farmer an opportunity to get a larger share of the retail dollar.

She told the roadside market operators that the Department is backing legislation which would tax farm land on its agricultural value and not speculative value.

"This legislation," she asserted, "will help roadside market operators stay in business, especially those in high population areas where the pressure for space to build homes, apartments and shopping centers shoots land values through the roof."

Bare said he and his brother, Harold, had started their operation 11 years ago. "We started with nothing," he said, "but we both wanted to build a good herd of cows. I think we did all right."

Average production in the Bare herd was 17,309 pounds of milk and 656 fat. They raised all their replacements, and bought good cows as they became available to replace the lower producers.

The brothers have dissolved their partnership so that Harold can take over a farm in the Atglen-Gap area. Hershey will stay at the Lebanon County location, and has already started building another herd.

No doubt every one of the 1500 people at Monday's sale are interested in seeing what the Bare Brothers will be doing in the next 11 years.

Consumers' Corner

Microwave Ovens

Fast cooking microwave ovens are finding their way into more and more home kitchens Although it's doubtful they will ever completely replace the standard oven, microwave ovens are useful if quick cooking is a must

One disadvantage of some microwave ovens is that the food doesn't look "cooked": the ovens don't brown foods. However, several manufacturers have brought out new models that have a browning element, so this problem may soon disappear

A second disadvantage is that metal pans cannot be used, food must be cooked on paper, glass or earthenware so that electronic waves can pass through

If you buy a microwave oven you will have to follow the manufacturer's instruction manual exactly to have satisfactory results And always have it serviced by a qualified technician

A microwave oven should not be operated when it is empty And it's a good practice to stay at least an arm's length from the front of the oven when it is in operation This means that children should not be allowed to use the viewport to watch food cooking

James E. Tyson, left, of Mt. Joy, and Richard E. Lefever, Lancaster, recently attended a week-long training session conducted at Sperry New Holland.

Tyson, Lefever Attend Sperry Training Program

James E. Tyson, mechanic for L. H. Brubaker, Inc., of Lancaster, and Richard E. Lefever, also a mechanic for L. H. Brubaker, have returned from a week-long training program at the Sperry New Holland Service Training Center at New Holland, Pa. While at the center they attended sessions in the service and repair of a wide variety of modern farm machinery.

Tyson, who resides in Mt. Joy, has been employed by L. H. Brubaker for 6 months. Lefever, who resides at 350 Strasburg Pike in Lancaster, has been employed by Brubaker for 5 months. Both men have extensive backgrounds in farming and mechanics.

The Sperry New Holland Training Center is one of the most modern training facilities in the nation for instructing dealer and company servicemen in farm equipment manufacturers. Providing quick, efficient service to farmers during critical harvest time is one of the company's top priorities.

WORDS ALONE WON'T SAVE THE ROCK

Many people have voiced their concern about preserving Chickies Rock, but few have put their words into action To act requires a commitment, to merely express concern doesn't

Don't get the wrong idea Concern is needed, but put some initiative into your concern, and you'll get results All of us need to get down to the grass roots of the problem—**preserving Chickies Rock.** Words alone can't describe the beauty of Chickies Rock And, words alone can't save it

Let your actions speak louder than your words **Preserve Chickies Rock.**

Meetings Scheduled on Nutritional Labeling

The U. S Department of Agriculture (USDA) announced that Los Angeles, Calif., and Washington, D. C., will be the sites of two briefings on its proposal to provide for a voluntary system of nutritional labeling for meat and poultry products.

The Los Angeles briefing will be Thursday, March 7, from 9:30 a.m. to 12:30 p.m. in Room 8544 of the Federal Office Building at 300 N. Los Angeles St. The Washington, D. C. briefing will be held March 20, from 1-4 p.m., in Room 218-A of the USDA Administration Building.

USDA's Animal and Plant Health Inspection Service (APHIS) officials said a panel of USDA inspection and nutrition specialists will conduct the sessions to provide information on the proposal. The meetings will be chaired by Nancy H. Steorts, special assistant for consumer affairs to Secretary of Agriculture Earl L. Butz.

Consumer and indu representatives as well as the general public are invited to the briefing, which will explain the background and intent of the proposed regulations so that the public may be better informed when submitting comments on the proposal to the Hearing Clerk in Washington, D. C. The comment period on the proposal will close April 19.

Under the proposal USDA's nutritional labeling program would coincide with the one established earlier by the U.S. Food and Drug Administration (FDA) for all other foods.

The USDA proposal provides for a voluntary program for meat and poultry processors, but it would become mandatory when a processor makes a nutrition claim or advertises a nutrition benefit for his product

Dear Livestock Farmer;

Dr. Cloy Knodt tells us that a ton of good quality alfalfa haylage containing 40% moisture and 20% crude protein on a dry matter basis can be an excellent source of protein and considerable economic value. Such haylage contains enough crude protein to equal that of 545 lbs. of 44% protein soybean meal which would cost $54.50 ($200.00 per ton) or $65.40 ($240.00 per ton). Therefore, alfalfa haylage can easily be worth $50 to $65 per ton just for its crude protein value as compared to buying soybean meal.

Sincerely yours,
Dick Enck

Easter Seals Help Dawn To Recover

Being chosen 1974 Easter Seal Child for Lancaster County is somewhat akin to being named beauty queen for four-year-old Dawn Marie Boley of New Holland. Dawn, a blue-eyed lass who is well versed on the use of "cheese" when having her picture taken, has already been the target of several pre-campaign publicity cameras for this year's annual Easter Seal fund raising drive, scheduled to begin this week.

But Dawn is taking it in stride, as she does her leg braces and the strenuous exercises that have become a part of her daily regimen. You see, Dawn suffers from Cerebral Palsy. She has never known what it is like to walk and run with ease.

But, that doesn't stop Dawn, "She's got a touch of bullheadedness in her," explained her mother, "if an exercise is particularly difficult, she just gets mad and tries even harder."

Dawn's first struggle began at birth. Born three months prematurely, she fought for life weighing less than 2½ pounds. For six weeks, her home was a glass incubator where thin metal probes and constant care protected her fragile body functions. At best, doctors gave her a fifty-fifty chance for survival.

Then her condition stabilized and, at two months of age, she was allowed to leave the hospital for the first time and live with her parents, Mr. and Mrs. Donald R. Boley. At home Dawn thrived and her parents thought their worries were over. It wasn't until she was two-years-old that they began to notice something was wrong. Try as she might, little Dawn just could not get her legs to walk right. It was as though somebody was pulling her heals up, so that only her toes would touch the floor.

Doctors diagnosed her problem as muscle spasticity in her legs caused by complications attributed to her premature birth. In March, 1974, she was referred to the Lancaster Easter Seal Rehabilitation Center by her family doctor and a pediatrician. A period of extensive evaluation tests by the Easter Seal therapy staff followed by conformation by a physician specialist and little Dawn was prescribed short leg braces and a program of therapy to be carried out by the Easter Seal staff team.

In September of that year (at the age of 2½) she was enrolled in the Easter Seal preschool developmental kindergarten. Here Lancaster County children are taught to cope with their disabilities so that they can lead as normal, active lives as possible.

For Dawn, the light at the end of the tunnel is near. Her therapy will have to continue, but her legs are responding and next year she is looking forward to attending a regular school kindergarten. For Dawn help was available, and someday the braces that she has grown up with will only be a fading memory.

For Dawn, Easter Seals made a difference.

Dawn Marie Boley of New Holland, the 1974 Easter Seal Child for Lancaster County, poses with a "friend" at the Lancaster Easter Seal Rehabilitation Center, where she is enrolled in the preschool developmental program.

Dear Livestock Farmer;

Dr. Cloy Knodt tells us that a ton of good quality alfalfa haylage containing 40% moisture and 20% crude protein on a dry matter basis can be an excellent source of protein and considerable economic value. Such haylage contains enough crude protein to equal that of 545 lbs. of 44% protein soybean meal which would cost $54.50 ($200.00 per ton) or $65.40 ($240.00 per ton). Therefore, alfalfa haylage can easily be worth $50 to $65 per ton just for its crude protein value as compared to buying soybean meal.

State Giving Exams for Real Estate Specialists

State civil service examinations for four levels of real estate specialists will be given until further notice, the State Civil Service Commission said.

SCSC director Richard A. Rosenberry said examinations for real estate specialist I-IV are held daily at the Commission offices in Harrisburg. Daily tests are by appointment only and require advance arrangements with the office at which the test will be administered.

Those applying for real estate specialist I-III must have had one to three years of technical real estate experience in addition to the two years of college. Applicants for real estate specialist IV must have a bachelor's degree plus three years of experience in technical real estate work.

Equivalent combinations of experience and training may be accepted. Applicants are advised to obtain copies of the examination announcement for specific details on position requirements and acceptable combiantions of experience and training.

Applicants for all levels except the real estate specialist IV must possess a current, valid driver's license.

Applicants, examination announcements, and further information may be obtained from State Civil Service Commission office in Harrisburg, or from local offices of the Pennsylvania State Employment Service.

from HISTORY'S SCRAPBOOK

DATES AND EVENTS FROM YESTERYEARS

On February 1, 1790, the Supreme Court held its first meeting.

Baseball's National League was organized on February 2, 1876.

Horace Greely, famous American journalist, was born on February 3, 1811.

The Confederate States of America was formed on February 4, 1861.

On February 5, 1937, President Franklin D. Roosevelt introduced proposals to reorganize the Supreme Court.

On February 6, 1952, King George VI of Great Britian died.

Sinclair Lewis, famous American writer, was born on February 7, 1885.

Bike Lanes Save Fuel

Bicycles, long admired by fitness fans, now are getting loving looks from gas-shy commuters as well.

If one out of every 10 commuters traveling an average of six miles switched from his car to a bike, five billion gallons of gasoline could be saved every year, says The Road Information Program (TRIP).

Of every 50 commuters, one uses a bicycle and 40 use a car. The others walk or use some form of public transit.

At present, there are few bicycle commuters because they must compete with cars and trucks on congested streets, says the Washington-based research agency. Narrow shoulders and bad road surfaces also spell trouble for the cyclist, TRIP points out.

If separate bike paths were built and shoulders on existing roads improved, TRIP says, the number of bicycle commuters would increase. The agency says expenditures for construction and improvement of bike ways are justified by increased safety and fuel savings.

Lancaster Farming Photos for Sale

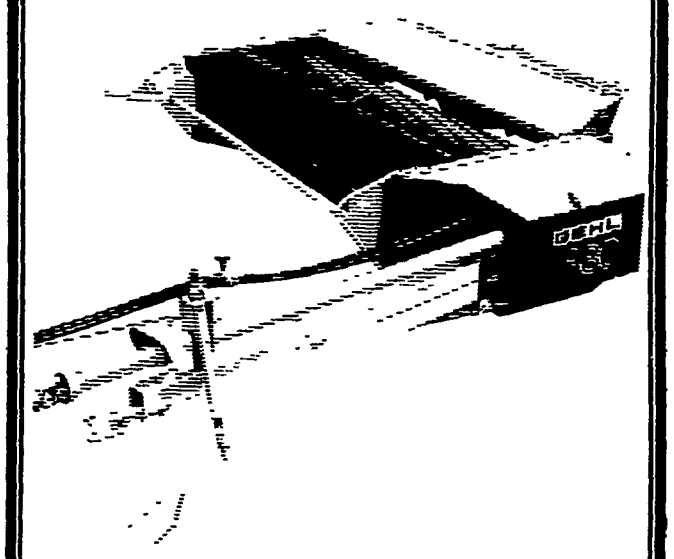
CUTS HAYING TIME



You'll save money, manpower and miles with this Gehl mower-conditioner. It mows, conditions and windrows (or swaths) in a single pass. Handles leafy legumes or coarse forages. You get a high, fluffy windrow that air passes through freely. Single, unitized frame makes the Gehl quiet running, especially on corners. Independent flotation to each end of the machine. Wheels are close to the cutterbar to carry the sickle constant with ground contours. You'll stay ahead of the weather. . .and get your haying done at nutrient saving speed.

Nutrena Sow-Matic

the self-fed sow feed

PATENT PENDING

Tired of hand feeding? Cranky, fighting sows? Put Nutrena Sow-Matic in a self-feeder.

Sow-Matic helps them limit their own intake, stay slim, keep satisfied. Even timid sows get the right nutrition—boss sows don't cause feeding problems.

WE HAVE IT! SOW-MATIC

Homestead Notes

Linda Petoff, Editor

Americans have come to associate foods with different regions of the world - they pick and choose their diets from traditions of the whole world. Our food has all sorts of social, geographical and cultural traditions. For instance we think of baseball and hot dogs, San Francisco and Chinese food, New Orleans and shrimp gumbo, the Southwest and chili, Mexico and tacos, or tequilla, whichever you prefer, young people and soul food, and so on.

Although you won't find recipes for the above mentioned foods, this week in Homestead Notes, we feature the hearty eaters of Vermont, and some of their recipes, taken from "The Vermont Village Cook Book." Being a Vermonter myself, I can assure you that they are hearty eaters, especially in winter, and the recipes are delicious. I hope you will take the time to try some of those you will find here, and enjoy them as well.

You will find recipes from beverages to appetizers to main dishes to desserts, along with a fine recipe for venison. We'll even tell you how to cook a ruffed grouse. Hope you have a good time with these, and enjoy them as much as I do your Pennsylvania Dutch cooking.

Bobo's Hay Tonic

¾ cup maple syrup (or half honey)
½ cup vinegar
1 teaspoon baking soda
½ teaspoon ginger
1 gallon cold water

Mix and serve. A very refreshing summer drink, especially after haying.

Vermont

xxx

Daisey's Cure for Arthritis

1 grapefruit
1 orange
1 lemon
1 tablespoon Epsom salts
1 tablespoon cream of tartar

Cut the fruit in quarters and place in covered container. Add one tablespoon Epsom salts and one tablespoon cream of tartar. Pour on one quart boiling water. Let the mixture stand for 12 hours at room temperature, then strain and put in the icebox, covered

Pitcher

Marinated Shrimp

2 pounds cooked shrimp
1 clove garlic
½ cup celery and 1 scallion, chopped fine
1 tablespoon chopped chives
6 tablespoons olive oil
3 tablespoons lemon juice
¼ teaspoon Tabasco
2 tablespoons each chili sauce and ketchup
2 tablespoons horseradish
1 tablespoon prepared mustard
¼ teaspoon paprika
¾ teaspoon salt

Rub large mixing bowl with garlic and combine remaining ingredients. Marinate shrimp in mixture for 12 hours. Serve chilled.

After years of being more devoted to cocktail sauce than to shrimp - one taste of this recipe and my devotion switched to marinated shrimp.

Smith

xxx

Cream of Cucumber Soup

2 medium cucumbers, grated coarsely
4 tablespoons butter
2 tablespoons flour
1 quart milk
1 cup chicken stock
Salt, pepper
Dill

Saute' cucumber in half the butter, set aside. Melt rest of butter, add flour, stock and milk, salt and pepper. Add cucumbers and heat thoroughly. Serve hot or cold with sour cream, topped with dill or parsley.

How to Cook a Ruffed Grouse

1. Clean bird as soon after shooting it as possible.
2. Do not hang. Put in your icebox.
3. Skin it. This gets rid of all feathers or down. If there are shot holes in the breasts they may contain feathers; probe with a toothpick or tweezers and extract.
4. Have bird at room temperature. Heat oven to 375. Do not wash bird in water, but wipe dry with a cloth wrung out in lemon juice. Salt and pepper bird inside and out. Truss. Put lump of butter the size of a small egg in the cavity. Tie a thin strip of salt pork over breasts. Do not stuff. Put bird in baking pan and into oven, cook for 20-25 minutes, basting with butter five minutes before done. Remove pork and discard.
5. Serve with bread sauce, currant jelly, and a bottle of good Bordeaux. Do not bother with vegetables, although some creamed celery is not amiss. Serve a bird apiece, breast only, as the legs are not fit to eat.

Morgenroth

xxx

Venison with Sour Cream

2 pounds venison
¼ cup fat
1 cup diced celery
½ cup minced onion
1 bay leaf
4 tablespoons butter
1 clove garlic
1 cup diced carrots
2 cups water
1 teaspoon salt
4 tablespoons flour
1 cup sour cream

Cut venison in pieces and melt fat in heavy frying pan. Add meat and garlic. Brown on all sides and arrange in dish. Put vegetables in remaining fat and cook for two minutes. Add salt, pepper and water. Pour over meat. Bake in slow oven until meat is tender. Melt butter in frying pan and stir in flour. Add water that the meat was cooked in and boil until thick. Add sour cream and more salt if necessary. Pour over meat and vegetables.

Serve with buttered noodles and currant jelly. This was a favorite of my friends, as I had plenty of venison in my freezer last winter.

xxx

Marinated Fresh Lamb Roast

1 teaspoon salt
½ teaspoon rosemary leaves
½ teaspoon ground thyme
½ teaspoon ground black pepper
1 teaspoon whole cloves
1½ teaspoons whole allspice
1 bay leaf, crumbled
1 teaspoon slivered lemon rind
2 slices lemon
2 tablespoons fresh lemon juice
2 beef bouillon cubes
2 cups hot water
5 pounds boned and rolled leg of lamb
½ cup sliced fresh onion
½ cup sliced carrots
1½ tablespoons flour
2 tablespoons cold water

Heat first 12 ingredients to boiling point. Pour over lamb. Cool and marinate in refrigerator 24 hours, turning several times. Add vegetables cover and bake in pre-heated slow oven for two hours or until lamb is almost tender, basting time to time with marinade. Remove cover and bake an additional 1½ hours or until brown. Remove meat from pan. Strain gravy and thicken with flour mixed to a smooth paste with two tablespoons water. Cook until slightly thickened. Serves 12.

Jordan

xxx

Seven Layer Casserole

1 cup rice, uncooked
1 cup whole kernel corn
Salt and pepper
2 cans tomato sauce
1 onion, minced
1 green pepper, minced
¾ pound ground beef
4 strips bacon

Heat oven to 350. Use two quart casserole with cover. Put in rice, corn, salt and pepper, one can tomato sauce, ½ can water; add onion and peppers. Then add beef, seasoned with salt and pepper. Pour over one can tomato sauce and ¼ can water. Cover with bacon. Cover, bake one hour, uncover, bake ½ hour. Serves 4-6.

Ballantine

xxx

Honey Without Bees

28 roses, take petals only
80 white clover blossoms
40 red clover blossoms
10 pounds white sugar
Alum, size of an acorn

Heat sugar, but not until brown or melted. Add six cups boiling water. Boil 10 minutes with alum. Take from stove, add rose petals and clover, which have been picked apart. Let stand 20 minutes. Strain, then pour into jars.

Nichols

xxx

Chocolate Pecan Pie

Pastry for 9 inch one-crust pie
2 squares unsweetened chocolate
2 tablespoons butter or margarine
3 eggs
½ cup sugar
¾ cup dark corn syrup
¾ cup pecan halves

Melt butter and chocolate together. Beat with eggs, sugar and corn syrup. Mix in pecans. Pour in pastry-lined pan. Bake at 375 degrees 40 to 50 minutes. Serve with vanilla ice cream or whipped cream.

Landgrove Library
Landgrove, Vermont

xxx

Bill's Cranberry Goozle

1 cup uncooked quick oatmeal
½ cup flour
1 cup brown sugar
½ cup butter
1 pound can whole cranberry sauce

Mix oatmeal, flour, sugar and cut in butter until crumbly. Put half of mixture in buttered 8x8 pan, add the cranberry sauce. Then top with the rest of the mixture. Bake in 350 degree oven 45 minutes. Great hot with ice cream, chewey cold.

LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

ASCORBIC ACID —and You

Don't lose it before you use it! Vitamin C – or its less popular term, ascorbic acid, long recognized as an important nutrient, is also one of the most sensitive to destruction when the commodity is subjected to adverse handling and storage conditions.

Plant tissues contain oxidase systems that are capable of oxidizing ascorbic acid Unflavorable conditions involving high or low (nonfreezing but chilling) temperatures, physical damage and wilting will produce stress conditions in the tissues. This accelerates the oxidation of ascorbic acid

Leafy vegetables usually keep best when stored just above their freezing temperatures–which also is the most effective way to maintain the vitamin C content in vegetables. Kale–which wilts easily–loses its ascorbic acid at relatively high (above 50 degrees) temperatures. Spinach, turnip greens, and collards do, too. Cabbage loses ascorbic acid more slowly – the reasons for this have not been determined Low temperatures are not the answer to all fruits and vegetables, in fact, some are injured at temperatures well above their freezing temperatures. "Chill susceptible" items might be sweet potatoes, cucumbers, squash, tomatoes, bananas, and some others.

The loss of ascorbic acid in peas and beans may be slowed by storing these vegetables in the pods.

GET THE MOST FROM BREAD AND CEREAL DOLLAR

Breads and cereals cost only pennies per serving, and those that are whole grain or enriched provide additional amounts of vitamins, minerals and food energy.

To help you get your money's worth from breads and cereals, consider these points:

- Whole-grain or enriched products are more nutritious than unenriched products.
- Spaghetti, macaroni and noodles in packages marked "enriched" are more nutritious and usually cost no more than unenriched ones.
- Ready-to-serve cereals in multi-packs of individual boxes may cost two or three times as much per ounce as the same cereal in a larger box.
- Cereals you cook yourself are almost always less expensive than the ready-prepared ones.

At Home On The Range

The weatherman has been heard to say that we are getting our April showers now, and that spring will be early this year. In salute to the weather, we feature this week a recipe for April Showers Cake, a bit early, but appropriate.

Many of you have responded to our request for chocolate shoofly. I'm sure that our reader who was looking for this recipe will be happy to find the variety in this week's column, including a wet bottom pie. The recipes also vary in quantity yields, some for two pies, and others for up to seven pies. It is a good idea to prepare enough filling for seven pies, bake one or two, and freeze the rest. That way, you can be sure of enough chocolate shoofly pie to please all of your family or company whenever they have the urge to eat one. Happy baking.

P.S. see Homestead Notes for recipes from another region, northern Vermont. Hope you enjoy trying some of the recipes featured there.

Filling
for one chicken

1 gallon bread cubes
1 pint celery cut fine
½ pound butter
2 eggs, or more if desired
1 tablespoon salt
Pepper to taste

Cut up heart, gizzard and liver. Grind and cook in butter. Also cook celery until soft. Melt butter, and pour over bread cubes. Stirring well, add beaten eggs and seasoning. Add livers and celery. Mix well. When you put into oven, add water to keep it moist.

"I never had luck until I got this recipe."

Salomie Glick
2003 Pennwick Road
Lancaster

xxx

Green Rice

2 cups boiled rice (after cooked)
1 package chopped broccoli, drained and cooled
2 beaten eggs
½ cup salad oil
1 small onion
1 cup milk
½ pound sharp cheese
(½ to 1 cup chopped ham, optional)

Cook and cool rice and broccoli. Mix remaining ingredients with rice and broccoli. Pour into a casserole and bake at 350 degrees for one-half hour covered. Remove cover and bake one-half hour longer.

Donna Sue Hetzel
York, Pa.

xxx

Spaghetti Casserole

1½ pounds ground beef
½ cup chopped onion
1 can (1 pound 12 ounces) tomatoes
¼ cup chopped green pepper
1½ teaspoons salt
2 teaspoons chili powder
1 teaspoon paprika
1 package (8 ounces) spaghetti, cooked
½ or 1 cup cheddar cheese, grated

Cook ground beef slowly until crumbly. Add onions, tomatoes, green pepper, and seasonings. Cover and simmer 45 minutes. Alternate layers of spaghetti in a greased two quart casserole, so that the top layer is meat. Sprinkle grated cheese over top layer and bake at 350 degrees for 20 to 30 minutes. Yields six to eight servings.

Mrs. Thomas E. Eckenrode
Lebanon RD4

xxx

Wet Bottom
Chocolate Shoo-Fly
Pie

Top:
1 cup brown sugar
1 egg
½ cup margarine

Mix one cup molasses and one cup hot water, one teaspoon vanilla. Add 2½ cups flour, pinch of salt and one level teaspoon soda, ½ teaspoon cinnamon.

Sift dry ingredients and mix well with top.

Wet Bottom:
2 cups white sugar
2 eggs
2 teaspoons corn starch
2 teaspoons flour
3 teaspoons cocoa
2 cups water
Butter, size of walnut

Bake at 450, 10 minutes; 400, 10 minutes, 350, 35 minutes.

Cook until thick and cool. Put approximately one cup of custard in the bottom of unbaked pie crust and fill three-fourths full of top.

"This is a very delicious pie. I also like to put a little icing on top. Good luck if you try this one yourself first.

Naomi Faye Blank
Honey Brook RD3

xxx

Chocolate Shoo-fly
Pie

Crumbs:
1 cup brown sugar
¾ cup lard
3 cups flour

Juice:
1 cup molasses
1 tablespoon cocoa
1 teaspoon soda
1 cup hot water

Mix crumbs in one bowl, then put molasses in a bowl, and cocoa and soda in a cup. Pour hot water on soda and mix in the molasses, then pour juice and crumbs together and beat until smooth. Pour into unbaked pie crusts.

Bake at 350 degrees about 45 to 60 minutes. Makes two pies.

Sadie Fisher
Christiana

xxx

Chocolate Shoo-fly
Pie

Top:
2 cups brown sugar
1 cup lard
3 tablespoons cocoa
2 eggs

Mix, then add:
2 cups molasses
2 cups hot water

Sift, then add:
5 cups flour
2 level teaspoons soda
1 level teaspoon cinnamon
1 teaspoon salt

Add:
2 teaspoons vanilla

Bottom, Mix:
2 cups granulated sugar
2 heaping tablespoons bread flour
2 heaping tablespoons clear jell
¼ cup cocoa

Add water to make paste.

Add:
2 eggs
2 cups hot water

Cook until thick.

Add
Butter size of walnut
2 tablespoons vanilla

Cool. Makes seven pies.

Bird-in-Hand

xxx

Pineapple Chocolate
Cookies

1 cup shortening
1 cup brown sugar
1 cup white sugar
2 eggs
1 cup crushed pineapple (with juice)
4 cups sifted flour
½ teaspoon baking soda
½ teaspoon salt
1 teaspoon vanilla
1 cup chopped nuts
1 cup chocolate bits

Cream shortening and sugar until light and fluffy. Add eggs one at a time. Stir in pineapple. Sift flour, soda and salt, add to creamed mixture. Stir in vanilla, nuts and chocolate bits. Bake at 400 degrees for 10 minutes. Makes 7 to 8 dozen.

East Earl RD2

xxx

Fingertip Jello

5 packages unflavored gelatine
2 cups cold water

Stir together and let stand.

2 6-ounce boxes flavored gelatine (cherry, strawberry, or raspberry)
2½ cups cold water
½ cup sugar

Combine and bring to a boil. Add to first mixture of gelatine and water. Stir in one cup cold water, pour into a long pan and put in refrigerator. The next day, cut in blocks, and eat with your fingers.

Mrs. Roy H. Garber
Lititz, RD3

xxx

April Showers Cake

3 cups sifted enriched flour
3 teaspoons baking powder
1 teaspoon salt
1 cup shortening
2 cups sugar
1 cup milk
1½ teaspoon vanilla extract
6 egg whites, stiffly beaten

Sift together flour, baking powder and salt. Cream together shortening and sugar until light and fluffy. Add flour mixture to creamed mixture alternately with milk and vanilla. Fold in stiffly beaten egg whites. Blend well. Pour into two greased paper-lined 9-inch layer cake pans. Bake in moderate oven (350 degrees) for 35 minutes.

Frosting

2 egg whites, unbeaten
1½ cups sugar
5 tablespoons cold water
1 teaspoon light corn syrup
Dash salt
1 teaspoon vanilla

Lancaster

Avoid Bird Jams

If you want to avoid an "aerial traffic jam" in watching for birds returning from the south, use late March and early April to keep track of your favorite species, suggests Merrill Wood of The Pennsylvania State University, author of "Birds of Pennsylvania."

Normally, about 16 species arrive in mid-March, 23 in late March, and 20 species in early April. But by early May the "traffic pattern" for bird arrivals is somewhat congested with 41 species appearing, the peak time for migrations.

The guidebook contains a calendar of birdlife, listing the species migrating into, or through Pennsylvania, during each month of the year. "Birds of Pennsylvania" is available for $2.12, tax included, from Birds, Box 6000, University Park, Pa. 16802. It contains 186 pen-and-ink drawings of the most common species in the State.

When driving to Penn State, you can pick up a copy in room 232 of the new Agricultural Administration Building at the corner of Shortlidge and Curtin Roads. The office is open from 8 a.m. to 5 p.m., Monday through Friday.

The volume was revised in 1973 and describes briefly the 378 bird species normally reported in Pennsylvania. The guidebook includes abundance, seasonal occurrence, habits and status changes, and general breeding and winter ranges.

Farm Women Societies

Society 1

The Society of Farm Women 1 at its recent meeting gave $25 to the St. Joseph Hospital Emergency New Mobile Intensive Care Unit and $10 to Easter Seals. The meeting was held at the home of Mrs. Daniel Brubaker, Ephrata RD1. Miss Rachel Bollinger was co-hostess.

Mrs. Paul Kurtz, president conducted the business meeting. It was announced that the project for the year would be providing financial assistance to the Lancaster County Mental Health Association for Children and Adults.

Mrs. Kurtz told the women that the annual Spring Rally will be held at Memorial Hall at the York Fair Grounds May 8. Reservations may be made with her before April 15.

Society members will sew at the Lancaster General Hospital on Tuesday, Apr. 23 from 9 a.m. to 2 p.m.

Bob Broome, clinical supervisor of the Emergency Mobile Intensive Care Unit at St. Joseph's Hospital, was the guest speaker

A covered dish luncheon will be held at the Farm and Home Center, Lancaster at 12:30 p.m. Saturday, Apr. 6. Each person is asked to bring their own place setting and one for a guest.

Mrs. Melvin Lauver, Akron, will speak on the topic "Crafts". Mrs. Roy Brubaker will present the devotions. Hostesses will be Mrs. Joseph Russel, Mrs. Howard Swarr, Mrs. Guy Reidenbaugh and Mrs. C. H. Nissley.

Society 6

Farm Women Society 6 met Saturday, March 2 at the home of Mrs. Emory Wolgemuth, with the president, Mrs. Anna Geyer, presiding.

During the meeting the group spent several periods in singing under the leadership of a guest, Mrs. Roy Forney. Devotions were led by Mrs. Esther Frey who led the thinking about the seasons, with special emphasis on spring. Twenty five members responded to the roll call by telling either about a winter experience or a favorite pet. There were five visitors present.

Anyone who can is invited to make bed pads at the home of Mrs. Harry Shonk at 9 o'clock on March 26. Bring lunch if you can stay for the day.

The society will serve a dinner at Wyeth Laboratories in Marietta on April 17. The Spring Rally for the state is to be held at Memorial Hall, at the York Fair Grounds on May 8. The birthday party for about 30 persons will be held at the State Hospital in Harrisburg on August 20.

The J. C. camp for retarded children was chosen as the county project for the year. Donations were also voted for Easter Seals, Cerebral Palsy, and an individual family.

Due to the funeral of a charter member, Stella Coble, the February meeting was cancelled so the reports of the state convention were given at this meeting by Mrs. Milton Eberly and Mrs. Harry Shonk. The program was a "show and tell" with members bringing their hobbies. Those shown were latch-key rug making, embroidery, quilting, oil painting, hair pin lace, crochet, egg carton waste baskets, covered hangers, broomstick lace, knitting, and sewing. There was an auction of home prepared food items with Mrs. Mae Gantz as auctioneer.

Hostesses were Mrs Minnie Wolgemuth, Mrs. Parthene Hess, and Mrs. Bertha Keller. The next meeting will be at the home of Mrs. Ray Hixon.

Society 7

Farm Women Society 7 met recently at the home of Mrs. Bruce Bernhardt. President Kay Rohrer called the meeting to order, and "Home, Sweet Home" was sung.

Mrs. Samuel Wenger led the devotions, reading the 46th Psalm, and reciting the Lord's Prayer. 28 members responded to roll call.

Society 22 will entertain Society 7 on March 12 at 1 p.m.

William Diaz, PU exchange student, showed slides from his home, Columbia, S.A.

The next meeting will be March 9 at 1 p.m., entertaining Society 23 at the Leacock Presbyterian Church, Paradise. Mr. Harold Keneagy, Paradise, will show slides and the roll call will be to name a spring flower.

Society 13

Farm Women Society 13 will entertain Society 29 and the County Board Officers on March 9, 1 p.m. at a luncheon to be held at the Witmer Fire Hall, Mt. Sidney Road, Witmer, Pa.

Roll call will be to introduce a guest Refreshments will be furnished by the Ways and Means Committee. Entertainment, in charge of the Program Committee, will feature Ken Chambers with "Humor with a Message."

Society 24

Farm Women Society 24 met recently at the home of Mrs. Ralph Stoltzfus, Morgantown. The hostess led the devotional period. Mrs. Glenn Shultz, president, announced the Creative Arts Group will meet March 12, 10 a.m. at the home of Mrs. Earl Wenger, 41 Mayfield Drive, Leola. The project for the day will be yarn Easter eggs. Ladies will bring a covered dish for lunch.

Society 24 donated $20.00 to LARK. The Ways and Means Committee revealed plans for the Annual Spring Rummage sale to be held March 19, from 8 a.m. to 3 p.m. at the Bareville Firehall.

Society 24 will be the guests of Society 8 March 26 at the home of Mary Sarver, Mt. Joy.

Special feature of the meeting was decorating with cream cheese. Demonstration was given by Mrs.

Farm Women Societies

(Continued From Page 37)

George Ebersole. Members enjoyed decorating radishes and crakers.

The next meeting will be held March 27, 7:30 p.m. at the home of Mrs. Calvin Wenger, 46 Glen Moore Circle.

Society 26

Farm Women Society 26 held their monthly meeting at the home of Mrs. Alvin Herr, Manheim RD2. Mrs. Merville Messick, 1005 Sheafer Road, Elizabethtown was co-hostess. Mrs. Robert Gantz lead devotions.

Ann Hinkel, of Lancaster County Farm and Home extension service, gave a demonstration on fondues. Games were played, in charge of the Game and Social Committee.

The next meeting of Society 26 will include visiting five rest homes in the Mt. Joy and Manheim area, to give small programs. The business meeting will be held March 28, at the home of Mrs. Carl Kline, Elizabethtown RD1.

Society 28

Farm Women Society 28 met Thursday evening, Feb. 28, at the home of Mrs. Roy Book. Mrs. Gordon Mellinger was co-hostess.

The group voted to support Camp Jaycees Project as the county project. The program was an evening of music presented by Mrs. Mary Hawk, local soloist.

The next meeting will be held March 28, at the home of Mrs. Donald High. The society will also visit the Lean Scene.

Saturday, March 16

2:00 p.m. - Farm Women Society 8 meeting.

Farm Women Society 3 meeting, at the home of Mrs. Jesse Balmer, Lititz RD4.

Farm Women Society 18 meeting at the home of Mrs. John Herr.

Federal Energy Official To Address Feed Parley

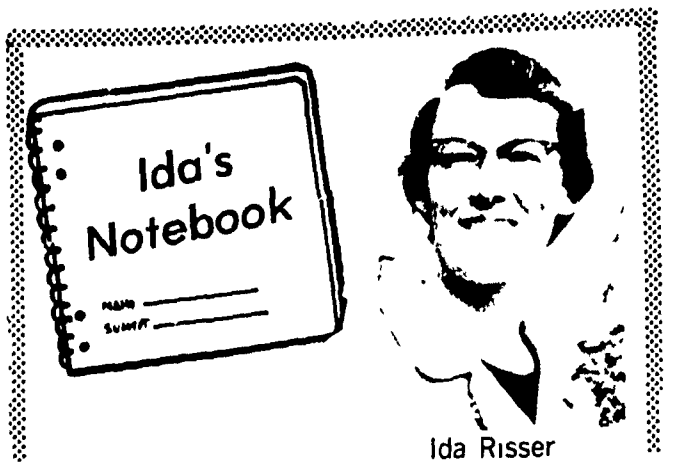
J. H. "Bud" Frazier, Jr., a member of the Federal Energy Advisory Board will speak at the March 20 Pennsylvania State University Feed Industries Conference to be held at the Motor Inn, Harrisburg.

Mr Frazier, a world-travelled former resident of Philadelphia now residing in Chicago, will talk on the "Energy Crunch in Agribusiness". He is a partner of Hennessy & Associates, a Chicago commodity trading group

According to Dr. Theodore Long, conference chairman and Penn State Professor of Animal Science, the conference is planned to analyze the cause and effect of shortages of such critical animal feed ingredients as nitrogen and phosphorus.

The day-long program will feature talks on ingredient substitution by experts, a panel discussion, and a talk by Nick L Turko of the Feed Fertilizer Division of the Pennsylvania Department of Agriculture

The Conference was planned by a committee composed of members from the University and PennAg Industries Association The Conference is open to all who have an interest and information and reservations may be obtained by contacting Dr William Sipple.



Ida Risser

You've heard of the calm after the storm - well that is how I feel now, after several days of hectic activity.

My father died suddenly and children and grandchildren gathered from all over the country. Most of the grandchildren had grown taller than he, but I'm sure they all had high regard for that small man with the white hair and pleasant disposition.

It seems that the grandchildren have the privilege of enjoying the best part of a grandparent's life - the part when they have time to relax and delight in the young ones growing up around them. It seems only as we grow older do we develop patience to deal with human frailty and weakness. He will be missed by all of his large family.

xxx

As more and more farmland is gobbled up for building developments, I think I see an ironical situation occurring.

The owners of the large homes in a development adjoining our farm often tell us that they truly enjoy seeing our heifers grazing early on a June morning. Or, they appreciate the game which comes out of the nearby woods to run, hop or scamper over their manicured lawns. The open countryside is pleasing to them and they don't want it changed.

Now I wonder if they consider the fact that they took someone's farm to build their house. It seems we only think of ourselves and are quite willing to deny others the opportunity to gratify their wishes. Other farm women have told me that their new neighbors have expressed the same feelings - "I have mine but don't give anyone else any".

Grange to Meet

Fulton Grange will hold their regular meeting March 11, 8:00 P.M. at the Grange Hall in Oakryn. Thomas Aaron, Star Farmer of the North Atlantic Region, will show the color-film "Stars of America". This film shows the Aaron farm and neighboring farms in Drewmore Township as well as the farms of the other three regional Star Farmers of America, four Agribusiness boys' businesses and all boys receiving their awards in Kansas City last October.

NATIONAL NUTRITION WEEK

"Nutrition $aves" is the theme of National Nutrition Week. It's being celebrated nationally this week, March 3 to 9.

This theme seems to make sense. For it's certainly true that with rising food prices your knowledge of nutrition is more important than ever. And certainly for families who have, one way or another, suffered financial setbacks, the nutritiousness of the food they buy with limited funds is a vital consideration.

Planning Is Essential

In the name of Nutrition Week, there is one main point I'd like to make. It has always been important to plan your family's meals carefully if you are to be sure everyone is getting needed nutrients. But as the budget tightens, planning becomes absolutely essential.

Just as people now have to plan when and where they will drive on the gasoline they can get, so must you plan more throughly before you get to the supermarket.

In the past, perhaps you pretty much filled up your shopping cart with anything you wanted at the time. Well, that's the route to inefficient buying. That's when you can unthinkingly pick out items that may offer little but calories. Or more expensive cuts of meat when less expensive ones will give you more nutrition per dollar.

So you must plan.

Your shopping list should, of course, provide your family with foods from all of the four food groups — the milk and meat groups, fruits and vegetables, and breads and cereals.

When buying fruits and vegetables, be sure to plan for green leafy and yellow vegetables as one category of that group, citrus fruits and tomatoes as another, and then other vegetables and other fruits such as potatoes, beets, cabbage, cauliflower, celery, corn, lettuce, apples, bananas, cherries, berries, grapes, etc.

In fact, it is in the fruits and vegetables groups that you can plan extensive variety to keep your meals interesting. Also to take advantage of seasonal price advantages, and the fact that these foods are offered fresh much of the time, as well as frozen and canned.

More For Your Money

Examples of more nutrition for your money include fresh or canned potatoes rather than potato chips, orange juice or milk instead of soft drinks. Substitutes for meat include poultry, fish, cheese, eggs, beans or peanut butter.

Mr. and Mrs. Kenneth Herr, Quarryville RD1, have just returned from a week long visit to Tahiti where they were guests of J I Case Company. The Herrs won the trip for performance in the area of sales, service, and promotion of Case tractors. Their business, located at Quarryville, is operated under the name of A. L. Herr & Bro.

Paarlberg says We Aren't Running Out Of Wheat

"Consumers do not face a bread shortage," days Dr. Don Paarlberg, director of agricultural economics for the U. S. Department of Agriculture.

"Charges that we will not have wheat to make into bread are simply not true," he said.

Dr. Paarlberg pointed out that the USDA estimates that the nation will have 178 million bushels of old-crop wheat left at the end of the marketing year on June 30—plus several hundred million bushels of new-crop wheat that will be harvested in May and June. The U. S. consumes about 530 million bushels of wheat a year for food uses.

The 1974 wheat crop is currently estimated at 2.1 - billion bushels—roughly four times our domestic food requirements, Dr. Paarlberg said.

"Our wheat exports are extremely important to the nation in generating export earnings," Dr. Paarlberg said. "These earnings are helping to pay for the increased costs of oil imports, along with the raw materials and low-cost consumer goods from overseas that are helping to keep inflation from running completely away with us. If we cut off wheat exports, we would raise the cost of our imports--and our cost of living."

Each week the USDA publishes a report on the amount of wheat on exporters' books that has not yet been delivered. "A large proportion of these reported contracts are for 'unknown destination'," Dr. Paarlberg points out. "That usually means an exporter has contracted for the wheat, but has not yet resold it to an end user. The wheat in these contracts is still for sale to the highest bidder, and it is physically located in the United States. A baker or anyone else who is afraid of running out of wheat can go out today and buy it back simply by offering the going market price.

"Many of these contracts for unknown destinations may actually have been made in the first place because the importers were afraid the U. S. government would impose export controls, allowing exporters to ship only a stated percent of their total contracts. About 7 million bushels of these contracts to unknown destinations simply evaporated from our last export report, and we expect this kind of evaporation to continue.

"That big 1974 wheat crop is our best insurance for moderate wheat and bread prices," Dr. Paarlberg concluded. "We have also removed restrictions against the importation of wheat, so that if wheat should become critically short, it can come in from other countries. In addition, the Soviet Union earlier agreed to defer delivery on about 40 million bushels of old-crop wheat until the new crop year."

Kutztown Grange Hears Readinger

The energy crisis, with its confusing and contradictory actions, could seriously cripple food production in the United States, A. Wayne Readinger, master of the Pennsylvania State Grange, warned during a regional conference held at Kutztown Grange Hall recently.

The proposed reduction in membership of the General Assemply was criticized by the State Grange master as a step backward toward "taxation without representation." The proposal, he said, would deprive rural areas and rural residents of adequate representation in the State Legislature.

Readinger also told officers of Subordinate and Pomona (county) Granges in this area that a new Keystone Exposition Center is "vitally needed" to replace the antiquated Farm Show building. He also discussed important legislation pertaining to the taxation of agricultural and open space land, state and federal pesticide regulations, highway funding and secondary road repairs, and the Pennsylvania Milk Marketing Board.

Attending the conference were local and county Grange Masters, lecturers, secretaries and heads of women's activities and membership committees.

During the workshop period, Readinger discussed the national farm program, and the Rural Development Act of 1972 and how it applies to Pennsylavnia communities.

He also outlined Grange program and objectives for 1974, and ritual and parliamentary procedures at Grange meetings.

Membership goals and suggested plans for state and national Grange membership awards were outlined by Mr. and Mrs. John Cressman, state membership assistants. Mrs. Ross Metz, women's activity chairman, emphasized the national Grange sewing contest now under way.

Miss Mildred Shultz, state lecturer, discussed plans for the leadership school to be held at Gettysburg June 25-27 and for talent contests to be held in 1974.

She also described the duties of lecturers (program chairmen) at the local and county levels.

J. Luther Snyder, state secretary, told the group of the Grange award program for secretary's, and outlined the duties of secretaries of local and county Granges

Destroy Gypsy Moths Now

Now is the time for homeowners in the northeastern United States to seek out and destroy moth egg masses, the U.S. Department of Agriculture (USDA) recommends.

From now until mid-April, leaf-eating gypsy moths are in the egg stage--buff-colored, velvety egg clusters. On homesites, egg masses appear on the undersides of tree branches, lawn furniture and attached to stationary objects such as recreational vehicles. In the woods, they are in bark crevices or on the undersides of tree limbs, rocks and other objects. All egg masses should be painted with creosote or completely scraped off into a can of kerosene.

"Since each egg mass contains 200 to 800 potential leaf-stripping caterpillars, destroying egg masses now is much more efficient than trying to kill individual caterpillars when they are feeding on the leaves in the spring," says Leo G. K. Iverson, deputy administrator of USDA's Animal and Plant Health Inspection Service (APHIS).

"We recommend that egg mass hunting be a neighborhood or area project. Otherwise, individual homesites will be 'cleaned up,' but caterpillars will move back into the same area in the spring from adjacent infested properties," Iverson said.

Gypsy moth egg masses now can be found in the infested areas of eleven northeastern states--Maine, Vermont, New Hampshire, Rhode Island, Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, Maryland and Delaware.

Gypsy moth caterpillars hatch in mid-April and May. In this stage they damage and kill trees by stripping them of their foliage. The insect pest was introduced into Massachusetts in 1869 and annually strips thousands of acres of trees in forests, homes, parks and recreational areas. During the summer of 1973, about 1.75 million acres were partially or entirely denuded.

Homemakers Should Know . . .

Milk Is Nutritional Food

Since nutrition has become a household word in America, the consumer should be told about milk's nutrients, according to Dr. E. W. Speckmann, Director of Nutrition Research at the National Dairy Council. He told participants in the Dairy Farmers' Seminar meeting on February 28 that the value of milk is greater than the sum of its parts.

Consumers must make daily decisions about food, and are becoming more conscious about economic and nutritional considerations. Dr. Speckmann cited the fact that while dairy foods (excluding butter) provided only 12 percent of the calories consumed in 1973, they provided 76 percent of the calcium, 42 percent of the riboflavin, 37 percent of the phosphorus, 23 percent of the protein, as well as high amounts of other important nutrients. Milk supplies the majority of vitamin D in the American diet.

At the same time, however, consumers have many misconceptions about milk. Thirty-three percent of homemakers surveyed by USDA, for example, thought that whole milk was 50 percent or more fat, and 80 percent of those tested thought milk has at least 10 percent fat.

The NDC scientist felt that milk's position in competitive market rests with its nutritional value. He suggested that all educational and advertising programs should be based on viewing milk as a food rather than as a beverage. Dairy foods hold up nutritionally under the closest scrutiny.

Going a step farther, Dr. Speckmann added that nature's own method of combining milk's nutrients has not been equalled by any imitation product. The protein, fat, lactose, vitamins and minerals all work together in milk to provide an economical, convenient, high-quality, and nutritious food package that no single food can beat.

FarmPrice Index Up

The February 15 Index of Prices Received by Pennsylvania Farmers was up 3 percent from mid-January according to the Crop Reporting Service.

Higher prices for milk cows, calves, sheep, lambs, slaughter cows, potatoes and feed grains more than offset lower prices for hogs and poultry. The index was 33 percent above a year ago.

Nationally, the Index of Prices Received by Farmers increased 2 percent. Contributing most to the increase since mid-January were higher prices for potatoes, wheat, corn, dry beans and lettuce. Partially offsetting were lower prices for cattle, hogs, and eggs.

Fire Damages Agway Mill

Denver and Stevens firemen responded to a roof fire at the Agway Feed Mill on Lime Road between Denver and Stevens at 2:40 a:m. Monday.

Stevens Fire Cief Robert H. Heil said the alarm was turned in by a Reading Railroad crew on a train which passed by just after the fire broke out.

Firemen estimated damage at between $800 and $1,000. No machinery was damaged.

Firemen traced the cause to an electrical wire that was propped up against the building.

Lebanon, Pa.
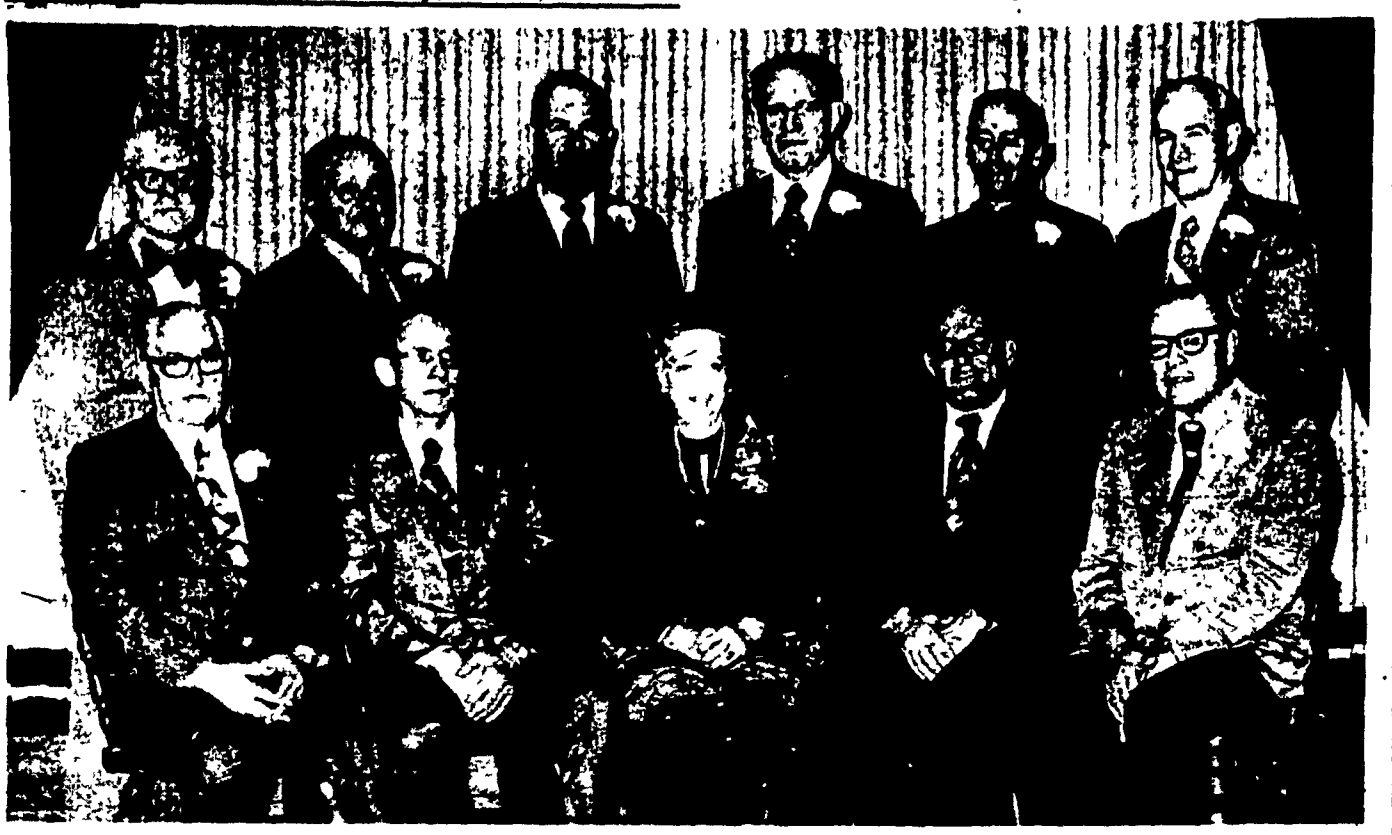
Located on Route 897 between Schaefferstown and Lebanon, over 30 years in business at same place



At a recent dinner held at Avalong Dairy Dining Hall, York, Penna. recognition for 25 years of service was given to nine Beacon Feed employees. Left to right, front row: James G. Campbell, Production Supt. of York Plant, Alem B. Smith, Vice-President and Director of Operations in Cayuga, New York, Miss Julia Gangloff, James A. Price, Gen. Mgr. York-Area, Raymond E. Rudisill. Back row: Charles C. Harter, Russell E. Beck, Luther E. Mummert. William C. Blouse, Wilford T. Myers and Thomas J. T. Ness. Each recipient was presented a certificate for 25 years of service and also each received a gold watch. Speaker for the occasion was Grover C. Gouker, General Manager and Instructor for Dale Carnegie Institute.

The beret originated in Italy during the Renaissance. Inside the band was a string, which could be tightened to fit any head. The tiny bow on the inside of men's hats today is a survival of that string.

Dear Livestock Farmer;

Dr. Cloy Knodt tells us that a ton of good quality alfalfa haylage containing 40% moisture and 20% crude protein on a dry matter basis can be an excellent source of protein and considerable economic value. Such haylage contains enough crude protein to equal that of 545 lbs. of 44% protein soybean meal which would cost $54.50 ($200.00 per ton) or $65.40 ($240.00 per ton). Therefore, alfalfa haylage can easily be worth $50 to $65 per ton just for its crude protein value as compared to buying soybean meal.

Sincerely yours,
Bill Wingenroth

NCEN PR Budget Request Approved

"The American Egg Board approved the first request of the National Commission on Egg Nutrition for $175,000 to continue its program on cholesterol at a meeting in Chicago on February 28," according to Edward Murphy, AEB Chairman.

Hendrik Wentink, Chairman of the Commission, outlined the program and presented the request.

Nineteen of the 25 active Directors, including all members of the Executive Committee, were present.

In addition to items for public relations, legal, and medical advisory fees, the budget included items to cover one or more professionally qualified spokesmen for the Commission, scripts, tapes, discs and film for public service radio and television, presenting the egg story.

A Fact Kit for egg industry people to better equip them to answer questions locally, 5 small exhibits for industry use, and a new nutrition column were also included.

"We believe the commitment of the first $175,000 re-emphasizes that AEB supports the work of the National Commission on Egg Nutrition and the dedication of each of the Commissioners on behalf of the entire egg industry," Murphy concluded.

United Way Committee Formed

Beginning last Thursday, some 40 volunteers began a long project that will continue to mid-June.

These are members of the United Way Budget Committee who will be assessing the needs of 35 community services as they relate to the funds generated through the annual United Way campaign.

Headed by two volunteers the committee chairmen are Fred R. Bahrenburg of Sperry New Holland and Robert R. Pebly of Educators Mutual Insurance Company. In order to determine fairly the financial needs of each service through an evaluation of its program and its effectiveness, the committee has been divided into three Divisions.

Walter J. Kissel of Raybestos-Manhattan in Manheim is chairman of the Health Maintenance & Care Services Division which includes the Easter Seal Rehabilitation Center, Alchoholism and Drug Abuse Council, Hearing Center and Visiting Nurse Association. The members are: Ned Gardner of Servomation; Alf F. Johnson, Fuller Company in Manheim; W. J. Johnson, Howmet Corp.; Charles J. McConnell of Armstrong Cork Company; Mrs. J. T. Miller of F & M College; John W. Snead of Sperry New Holland; Mrs. H. G. McCarty and Mrs. Silas Thompson of Lancaster.

The Individual and Family Life Services Division is in two Sections with George E. McCreery of Mac-It Company heading Section A. The services included here are Family and Children's Service, Lancaster Day Nursery and Mental Health Association. The volunteer section members include Charles A. Bender of National Central Bank; Mrs. Edward T. Holland, Jr., of Lancaster; the Rev. Eugene Madeira of Reigart School; Philip E. Raezer of Sperry New Holland; Robert L. Wertz of Lancaster Surgical Supply and Mrs. Juanita D. Wright of McCaskey High School.

Rodney K. Wills of Donnelley Printing Company heads Section B which includes these services: Neighborhood Services, Urban League, Catholic Social Services and the Salvation Army.

Section B members are Richard S. Garrett of Fulton National Bank; Vincent P. Herron of Armstrong Cork Company; Dewitt Ingham, F. Tyrone Lackley and P. William Masengarb, all of Donnelley Printing Company; Leo MacCourtney of WLYH-TV; C. Price Smith of RCA and Richard Whisler of Educators Mutual Insurance Company.

The Social Adjustment and Social Development Services Division with C. Kimber Beagle of Sperry New Holland and Mrs. Betty Jones of Lancaster heading each section.

Section A includes Boys' Club, Boy Scouts and Girl Scouts. These members are Mrs. Sydney D. Brener of United Twine & Paper; Lewis P. Hershey of Diller-Hershey Realtors; Angelo Manolas of the Social Security Administration; Mrs. Theodore A. Powl and Mrs. William R. Schult of Lancaster; and David M. Vitale of Millersville State College.

Section B will work with the Jewish Community Center, YMCA and the YWCA. These members include Mrs. Nicholas C. Brown, Mrs. Paul Gschwend II, Mrs. Edward Jones, all of Lancaster; William E. Hankins and T. J. Woodland of Armstrong Cork Company and John O. Shirk, Esq.

Meetings with agency representatives will continue from now through June 13 when a final report of the evaluations will be made to the United Way Board of Directors.

Eighteen northern Lancaster County dairymen were honored for having high producing herds this past year at the tenth annual District 4 Meeting for Atlantic Breeders Cooperative members held recently at the Blue Ball Fire Hall.

Receiving Certificates of Merit for having top Dairy Herd Improvement Association averages were left to right: David L. Landis, Clyde W. Martin, Donald S. Eby, Albert E. Fry, Earl N. Landis, Galen W. Crouse, Titus B. Stoner and John S. Yost. Also receiving awards but not pictured, were Rufus Martin, Henry Kettering, Amos & Elanor Hershey, Robert & Joan Book, Jacob Dienner, J. Kenneth Hershey, Nelson E. Martin, Hiram S. Aungst, Henry & Paul Martin, and Masonic Homes Farm. All herds were at least 15 per cent above the state average for butterfat last year, while at least two-thirds of the cows in these herds are progeny of Atlantic sires. The awards were presented by Edwin Sauder, Atlantic's Field Supervisor for this area.

DEKALB

VAN DALE

DA 1230

There's A Difference!

Here's a rugged new breed of silo unloader with a big difference from other machines — a difference that means better performance.

The DA 1230 has double augers but more important they're **differential augers**. The rear auger is larger than the front auger and the two augers turn at different speeds. The result is up to 30% more wall pressure for smoother performance in all types of silage soft or frozen. Silage flows into the impeller in an even stream — no slugs or pads of silage that can clog other machines and rob capacity. The differential augers break up compressed silage to give you smoother operation and greater capacity. You get Non Stop Feeding with the new DA 1230 unloader.

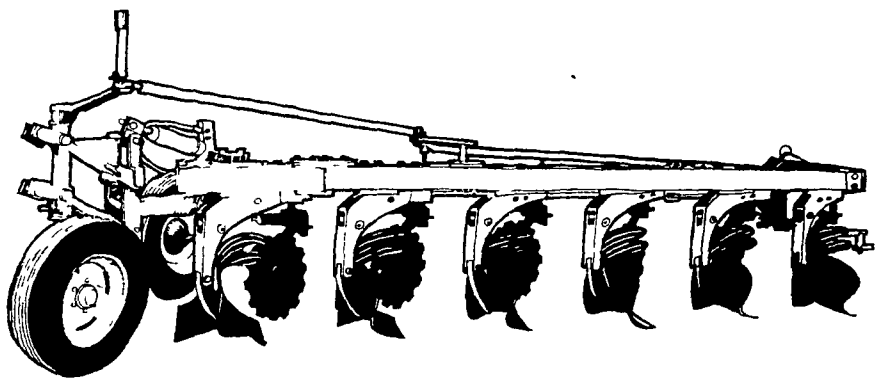
The tough plows for your roughest fields



710 SEMI-MOUNTED PLOWS

Built to make short work of rocky, stumpy, trashy fields, International® 710 Plows have big clearance, heavy construction, and maneuverability to follow tractors in short turns.

- Available in 3- to 8-bottom sizes
- Steerable tail wheel for short turns and smaller headlands
- 30 in. vertical clearance, 31-1/2-in. fore-and-aft clearance with 18-in. bottoms, 28-in. fore-and-aft with 16-in. bottoms
- Automatic or spring-trip beams
- Independent hydraulic control of front and rear of plow
- Extra-heavy construction

Stop by today and see the 710 Semi-Mounted Plows.

agoutlook

LESS MONEY IN 1974 . . . Net farm income is forecast at $20 to $23 billion in 1974, down from the record of over $25 billion last year but still the second highest ever. USDA economists expect that, barring bad weather, farm prices of both crops and livestock will average about the same this year as in 1973 while marketings may edge up. However, partially offsetting will be lower government payments—down sharply from 1973's $2.6 billion—and a roughly 5 percent rise in production expenditures. All of this year's increase in production expenditures is expected to be in spending for inputs of nonfarm origin.

FINANCIAL POSITION OF FARMERS . . . The value of assets in the farming sector as of January 1, 1974 was $441 billion, up 15 percent from a year earlier. Farm real estate made up two-thirds of these assets. Total debt, at $80 billion, was up 9 percent. With the value of assets increasing faster than debt, debt amounted to 18 percent of assets, compared with 19 percent the year before. The ratio of net income from farm sources to total debt outstanding is one measure of farmers' ability to service their outstanding debt commitments. This ratio was expected to be about 36 percent at the end of 1973, up some 4 percentage points from the ratio reported for the end of 1972.

LAND USE INVENTORY . . . About 80 percent of the more than 2 billion acres of land in the United States is used for crops, pasture, and forestry, according to USDA economists. Their analysis of data from the recent census, USDA agencies, and other government sources shows that about one-fifth of our total area is devoted to crops, more than a fourth is permanent grassland, and one-third is forestland. The rest is distributed among urban and transportation uses (less than 3 percent); recreational, wildlife, and other extensive special uses (5 percent); and unclassified areas, including Alaska tundra (13 percent).

TOBACCO OUTLOOK OPTIMISTIC . . . Higher farm quotas for burley and flue-cured tobacco seem likely this year in face of the brisk demand that prevails for U.S leaf at home and abroad. In short, growers are expected to produce more tobacco in 1974; price support levels will rise, helping growers obtain prices near last season's record high; and cash receipts should gain from 1973's $1.6 billion. The only sour note: Production costs will climb, too, with big gains coming in fuel and fertilizer spending.

BYE, BYE BOLL WEEVIL . . . The boll weevil can be eliminated as an economic pest of U. S. cotton, according to USDA scientists after a 2-year test of suppression procedures. The sicentists have worked out a program of insecticidal, cultural, and biological controls—used simultaneously or in sequence. This integrated program has a suppression effect that is greater than the sum effects of each method employed alone. Were the boll weevil to be wiped out, it would mean an estimated one-third reduction in the total insecticide load put into the environment by U.S. farmers . . . plus a saving of around $200 million annually in cotton losses and $75 million on control measures.

SOYBEAN STATUS REPORT . . . Soybean supplies in 1973-74 total a record high 1,627 million bushels, more than a fifth above last year. An all-time large crop in 1973 of 1,567 million bushels is more than offsetting the small beginning stocks. Soybean demand is staying strong . . . USDA economists expect nearly 1.4 billion bushels to be used in 1973-74, up from 1.3 billion last year. Both crushings and exports are slated to rise. But despite the optimistic demand outlook, there will be a sharp buildup in stocks next September 1 to an estimated 240 million bushels, compared with the extremely low 60 million this year. Economists foresee average 1973-74 prices reaching about $5.65 a bushel (weighted by marketings), about a third above 1972-73.

HIGH PROTEIN FEEDS . . . Following the memorable 1972-73 season of hard-to-get supplies and sky high prices, the demand for high protein feeds in 1973-74 may not increase for the first time in several years, say USDA economists . . . despite larger supplies of soybean meal and lower price prospects. Livestock feeders who were unable to acquire adequate supplies for optimum least-cost rations in 1972-73 adjusted their feeding program by using more nonprotein nitrogen, reducing protein content of rations, and in some cases omitting protein-feed concentrates entirely when good quality grain and roughage were available. As a result, feeders may be a little slow in moving back to high protein feed markets, even at prices substantially below the high levels through most of 1972-73.

PROTEIN FEED USAGE . . . Domestic use (soybean meal equivalent excluding urea) in 1973 is forecast at 19.7 million tons, 6 percent above last season which was the smallest volume in 6 years. High protein animal units are forecast at 143 million, 3 percent above 1972-73 and the sharpest gain since 1966-67. Coupling the supply with the animal units gives a protein feed disappearance of 276 pounds per animal unit, 8 pounds more than in 1972-73 but still well below the 285-292 pounds of 1969-71.

TURKEY PRODUCTION . . . Output during the first half of 1974 will likely run well above January-June 1973, based on the 13 percent gain in August-October 1973 poult production over a year earlier and an 8 percent boost in eggs in incubators on November 1. Price depressing effects of the anticipated larger first half output will be partly offset by strong demand for turkeys for further processing, increased consumer incomes, and relatively high red meat prices. However, turkey prices likely will decline and may dip below year-earlier levels by spring.

BEEFING UP BEEF PRODUCTION. . . USDA researchers see enough capacity for a 60 percent boost in beef and veal output by 1985—with the quantity climbing from about 21.7 million pounds last year to 35 million pounds if the economic incentive is sufficiently strong. Most of this potential gain would come from a 40 percent boost in animal numbers; however, there is some potential for upping the output from each animal. Crossbreeding and artificial insemination of beef cows could result in up to 20 percent gains in beef production efficiency. Multiple births, or twinning, also offer a big potential for lifting production efficiency.

LOOKING BACK AT FOOD CONSUMPTION . . . The sharpest drop in 15 years occurred in per capita food consumption in 1973. About 1-2 percent less than in 1972, consumption was at its lowest level in 4 years. A gain for crop-related foods, largely fruits and processed vegetables, only partly offset a 3 percent cut in use of livestock products. Last year saw sharp declines for meat and eggs and smaller drops for poultry and fish.

NEPPCO Turkey Conference Scheduled For March 20

The NEPPCO Mid Atlantic Turkey Conference will be held in the Sheraton Inn, Gettysburg, Pa., on Wednesday, March 20, starting at 10:00 a.m.

The Conference is sponsored by the Turkey Divisions of the Northeastern Poultry Producers Council (NEPPCO) and the Pennsylvania Poultry Federation. All interested persons, whether members of either sponsoring organization or not, are welcome to attend.

"The gasoline shortage need not deter turkeymen from attending this Conference," reports NEPPSO's Executive Director, Richard Ammon. "Arrangements have been made so that those traveling a distance will be able to obtain fuel in the Gettysburg area for the return trip."

Lead-off speaker on the Conference program will be Pierre Boucher, chief of the Marketing Programs Branch of the Poultry Division of USDA, who will present the "Outlook for Turkeys this Year". Boucher was formerly executive secretary of the Massachusetts Poultry Association. Since joining USDA, he has been involved with the preparation of the "Turkey Guides". He currently heads the government's turkey procurement program and the collection and analysis of turkey marketing statistics nationally.

Following Boucher's talk, attendees will have the choice of two concurrent workshops. The Production Workshop under the direction of Dr. Gordon B. Meyer of VPI&SU will cover such subjects as housing, insulation, brooding & management, while the Processing & Marketing Workshop will tackle inspection and other government regulations, shelf life of fresh dressed birds, freezing, freeze-drying and packaging.

Bill Shepard, newly elected president of the National Turkey Federation and general manager of Goldsboro Milling Co., Goldsboro, NC, will be guest speaker at the luncheon.

"The Other Side of the Case" is the title of an intriguing dual presentation on the afternoon program. The "Case" referred to is the in-store refrigerated turkey display case. Ms. Mary Hochendorner, consumer specialist for the Pennsylvania Dept. of Agriculture, will give "The Consumer Point of View"; and Charles Radle, a Pennsylvania food inspector, will discuss "The Inspection Point of View".

Anchor man on the Conference program will be Dr. Loren Nichols, turkey nutritionist with Central Soya Co., Inc., of Decatur, Indiana, who will discuss the balancing of amino acids in feeds and the formulation of least-cost feeds with today's high-priced ingredients in a talk entitled, "Optimum Profit Turkey Feeding".

Registration fee for the Conference, which includes lunch, is $12.00. Advance registration is recommended and can be made by sending name, address and check covering the fee to: NEPPCO, 322 Oxford Valley Road, Fairless Hills, PA 19030.

Hearing on Milk Dating Rules Set

HARRISBURG – Pennsylvania Agriculture Secretary Jim McHale has announced that a hearing on milk dating requirements will be held on March 26 beginning at 10 a.m. here at the Agriculture Building in Room 309.

The hearing concerns proposed amendments to the state's milk sanitation regulations that would provide for uniform dating requirements on milk containers and improve the testing requirements and standards for abnormal milk.

The Department of Agriculture has been developing uniform milk sanitation standards since local municipalities were prohibited from writing differing regulations under Act 120, signed into law in 1972. Standards already adopted include maximum storage and transportation temperatures for milk.

By adopting statewide uniform milk sanitation standards, Pennsylvania has been able to enter into reciprocal inspection agreements with other states. This has meant that farmers selling milk across state lines have not been subject to multiple inspections and costly fees.

McHale said the hearing on proposals to stamp maximum milk sale dates on containers stems from requests by certain consumer groups during the year to adopt dating requirements. Milk industry spokesmen say they have used voluntary dating systems and maintain that, through research conducted by the state Department of Health, there have been no reports of milk-borne illnesses for years. Consumer and milk industry representatives will attend the hearing.

Merger Approved

Two long-established savings and loan associations in Reading have merged to become Wyomissing Provident Federal Savings and Loan. Receipt of approval of the merger by the Federal Home Loan Bank board was announced jointly by George B. Gaul, president of Wyomissing Federal Savings, and Marlin G. Kachel, Provident Federal president.

Gaul stated that the single institution will be the largest savings association in Berks County with assets of approximately $90 million. He noted that increased investment opportunities will be offered to customers, and the ability to finance homes in Berks County will be expanded.

He emphasized that all personnel of both associations would be retained in their present positions.

Twin Valley FFA Members Receive Awards at Banquet

More than 200 persons attended the nineth annual Parent and Member Banquet of the Twin Valley Chapter Future Farmers of America. The Banquet was held Friday, March 1, in the Elverson Firehall, Elverson, Pa.

Presentation of a number of awards and citations followed a family style ham dinner served by the Elverson Fire Company Auxiliary. Mr. and Mrs. Fred Samuels, Mr. and Mrs. William Ford, Mr. Harold Bamberger, Mr. Charles Gable, and Mrs. Ruth Houck were received by the chapter as honorary FFA members. Chapter officers received these persons into the honorary membership using the official Honorary Degree Ceremony. Mr. and Mrs. Samuels and Mr. and Mrs. Ford received honorary membership for the help they have given their sons which enabled them to receive the Keystone Degree this past January. Mr. Harold Bamberger is the President of the Twin Valley School Board and has supported the chapter in this capacity. Mr. Charles Gable has assisted the chapter and chapter members to complete various projects. Mrs. Houck has also assisted the chapter to complete many projects.

James Hughes, son of Mr. and Mrs. James Hughes of RD1 Birdsboro, received the chapter Star Greenhand Award. This award is given to the outstanding first year student in the FFA. Terry Murray received the Star Chapter Farmer · Award, which is given to the student with the best animal or crop project and the most leadership activities. Terry also received foundation medals in chapter scholarship, and placement in agricultural production. William Ford III received the Star Chapter Agribusinessman Award. this is presented to the senior student with the most outstanding work experience project.

Foundation medals were also presented to: Robert Stotzfus for livestock production and for soil and water management; Melvin Houck for livestock production; Douglas Yoder for crop farming.

Larry Stoltzfus received the dairy farming award, and the award for agricultural mechanics was presented to Harold Steve. Gary McVaugh received the ornamental horticulture award, and Ronald Smoker and Larry Stoltzfus received awards for public speaking.

John McNeill was presented a plaque for his service to the chapter in organizing the chorus and serving as pianist for the last two years. Lugene Becker received a plaque as the Chapter Sweetheart for the current year. She was chosen by a committee of chapter officers and served as the FFA nominee for Valentine Queen. William Ford and Terry Murray were presented with the gold charm of the Keystone Farmer Degree and trophies signifying their elevation to this degree. Terry Murray also received a $25.00 savings bond as the high salesman for the Christmas Citrus Sale. Nevin Mast, former chapter President and current State FFA Sentinel, was presented a special plaque in honor of his service to the chapter and the FFA.

Ronald Smoker recognized members of the community who have assisted the chapter during the past year. Persons and firms recognized were: Donald Simmers, Elmor Chevrolet, Morgan Trailers, Stoltzfus Brothers IGA, Mr. Harry Hart, Miss Mary Louise Duval, Mr. Wilmer Kraybill, Frank Stoltzfus, Nevin Mast, and Gary Stoltzfus.

Weight Indicates Quality

The price doesn't always indicate quality when it comes to bread. In general, the price of a loaf of bread is not a good indicator of its nutritional value. Penn State Extension foods and nutrition specialists suggest you look for an enriched white loaf or whole wheat loaf by weight rather than the size of the loaf.

For more buying and serving information on bread, and other foods necessary for good health, write to: FOOD, Trudy Dougherty, Chester County Extension home economist, 402 North Wing, Courthouse, West Chester, Pa. 19380.

Dry Cow Meet At Garden Spot

Garden Spot Young Farmers will sponsor a meeting, March 12, 7:45 p.m. at the High School ag room. The topic to be discussed is Dry Cow Management.

Speakers will be Mr. Gerald Hess, nutritionist, and Dr. Melvyn Wenger, veterinarian.

Areas to be emphasized at the meeting are needs for proper protein energy, mineral balance during the dry period, common mistakes and misconceptions and dry cow mastitis treatment and medications.

Proper dry cow management is one of the most neglected areas of dairy herd management. This study will center on exposing this neglect and establishing management practices that will work toward improving this critical management period.

All area dairymen are invited to attend, refreshments will be served.

Plant Proteins, Vitamins Not Affected by Fertilizer

Fertilizer increases yields but has little effect on the protein and vitamin content of food plants, according to scientists with the Agricultural Experiment Station at The Pennsylvania State University. Protein content is controlled by genes while vitamin content is influenced by both genes and environment, declared Drs. R. M. Leach, E. L. Bergman, and D. E. Baker of the Penn State faculty.

They said many years of worldwide efforts to alter the protein and vitamin content of plants through fertilization have been relatively unsuccessful. Their comments are featured in a special foods issue of "Science in Agriculture," the quarterly magazine of the Agricultural Experiment Station.

The forage grasses, they noted, are one exception to the concept that genes control protein content. Such grasses respond to nitrogen fertilization with some increase in protein.

Variation in plant mineral content can be reflected in a number of health problems affecting human beings and animals. Included among such health conditions ar iodine deficiency or goiter, cobalt deficiency, magnesium deficiency or grass tetany, selenium deficiency, selenium toxicity, and molybdenum toxicity.

The special issue of "Science of Agriculture" contains 14 articles featuring developments in food science. Copies are available free from the Agricultural Mailing Room, 112 Agricultural Administration Building, University Park, Pa. 16802. Ask for the foods issue of "Science in Agriculture."

In their report, Dr. Leach and associates mentioned widespread public interest in organic plant production. They observed, however, that plants usually take up essential nutrients as inorganic forms. Thus, if soil nutrients are applied in organic form, the nutrients must first be converted to inorganic form in the soil before being absorbed by plants.

This means that plants produced on organically-fertilized soils are not necessarily of higher nutritional quality than plants grown with the use of inorganic fertilizers.

This does not suggest that organic material is of no value, the Penn Staters commented. Organic fertilizers improve soil characteristics such as water-holding capacity, tillability, and rain absorption capacity. Applying waste materials to the soil provides a means of recycling wastes to improve environmental quality.

Several projects are underway at Penn State to study the effects of applying waste materials to the soil. In one study, the effect of repeated application of sewage sludge upon plant composition and animal health is being investigated. The results will lead to a better understanding of the transfer of mineral elements from the soil through plants in the food chain of animals and man.

A second project, related to wastes as applied to soil, involves the development of a new soil testing procedure. This new procedure will determine how much of each element is available for uptake by the plant. From such a soil test it would be possible to predict the potential for altering plant composition and subsequent human and animal health when applying waste materials to the soil.

A third project relates to the effect of dried poultry manure on vegetable production, with and without additional application of various essential elements as inorganic fertilizers. Results after two years of studies have shown that best yield was gained when additional phosphorus, potassium, and magnesium were added to the soil. Of course each crop has specific nutrient requirements and plant nutrient application should be based on the results of soil tests.

Development School Planned For Community Leaders

About 110 grass roots community leaders from 13 states and Puerto Rico gathered at the Kanuga Conference Center near Hendersonville, N. C., Sunday, Mar. 3 for the second National Rural Development Leaders School.

Among highlights of the session, coordinated by USDA's Rural Development Service (RDS), were speeches by U. S. congressmen and Agriculture Department officials.

Purpose of the school is to teach community leaders how to be more effective in their rural development work. The course is an intensive program of lectures, discussions, and group assignments of practical decisionmaking based on community development problems.

The students represented rural communities in Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and Puerto Rico.

Faculty members for the school were from government, industry, business, education, and public interest groups.

Subsequent offerings of the school, to be held in different regions of the country, are being planned. These sessions will be announced as programs for them are developed.

American Farmers Speak up for Agriculture

Farmers and farm wives have issued a message: "Don't blame us for inflationary food prices."

The food and fibre growers across the nation expressed their views on food prices and other vital agriculture topics in a national "Speak Up For Agriculture" letter writing competition sponsored by the Agriculture Public Information Council.

Today the APIC announced the three Master Spokesman contest winners selected by a panel of judges. Each award winner receives $100 and a plaque honoring their achievement. The winners are: Mrs. Neva Parker, Groveton, Texas; Mrs. Tom McClellan, Verdigre, Nebraska; and Edward Gray, St. Johnsville, New York.

APIC also made 16 $50 awards during the past year to writers judged as quarter finalist winners, and another 100 entrants submitting letters received cash awards.

Purpose of the competition was to assist those involved in farming build a strong sounding board which they need to focus national attention on the agriculture's problems and opportunities. The APIC worked closely with the farm press across the nation to encourage letters on all topics affecting agriculture in today's economic climate.

The three winning letter writers placed heavy emphasis on the fact that the American famer is not the one responsible for the high food prices that so plague the nation.

Wrote Mr. Gray: "The city dweller or non-farmer is not the only person who has to cope with high prices. . . the farmer may earn more now, but in the last 50 years our wages have not increased four to five times as great as have the wages of the non-farmer. . ."

In her award winner letter Mrs. McClellan noted: "When a city dweller sees the farm equipment on a farm, he thinks that the farmer must have lots of money – he has to make such a big capital investment and he has a difficult time to have enough left over for a decent living. . ."

Mrs. Parker wrote that "More people should get their hands soiled in a backyard garden and learn what it takes to produce food. People are depending on an inflated dollar to bring food to their tables. . ."

L. F. Czufin, Chevron Chemical Company, and founder of APIC, said the organization's goal is to make certain that Secretary of Agriculture Earl Butz, senators, congressmen and members of House and Senate Agriculture Committees are aware of the voice of the American farmer. Throughout the contest APIC encouraged writers to forward copies of their letters to their legislative representatives.

Czufin said APIC was highly encouraged by the response to the competition. "The gentle prod of modest cash awards has encouraged farmers and farm wives to 'Speak Out'." He said agriculture has been silent too long. "APIC provides a vehicle for agriculture to bring its views before urban dwellers as well as federal and state legislative leaders."

Czufin concluded by expressing appreciation to the nation's farm press for their whole-hearted support of the APIC program.

Agpro, Inc. has announced a manure solids separator, 'Bova Sieve," that can be used with most liquid manure pumps. The Bova Sieve separates the solids from manure slurry allowing the solids to be reused. With the heavy solids removed, the remaining liquid waste becomes quite easy to handle in pumps and is frequently spread back on cropland. Primary use of the reclaimed fiber has been for freestall bedding A company spokesman states that the material is clean, stable, relatively odorless and a very suitable bedding material. Other uses are· nursery mulch, organic soil conditioner, or as a feed supplement. For more information of this equipment and a free sample of "Bova Shred" the fibrous product of the Bova Sieve, write Agpro, Inc., Route 7 Box 100, Paris, Teas 75460.

SELLING AT 12:00 NOON

101 HOLSTEINS 101

55 Cows; 10 Bred Heifers; 10 Open Heifers Ready to Breed; 15 Open Heifers 6 months to 10 months; 10 Started Calves; 1 Registered Holstein Bull of service age from Dave Reed's herd; 5 Registered Cows Sell; The Rest Are Grades

T.B. Accredited and Bangs Certified — Tested within 30 days for interstate shipment.

Nearly all are sired by A.I. sires from the Atlantic Stud and the herd is now bred to Atlantic or ABS bulls.

DHI tested until June 1973. The herd average for 1972 was: 14,943 3.6 percent 539. The 1971 average was 14,246 3.7 percent 522. The four years previous to that was 535F, 492F, 532F and 525F.

Although no official testing has been done since last June, monthly milk weights have been recorded and the tests from the dairy for December '73 was 4.0 percent, November '73 was 4.3 percent, October was 4.0 percent and September 4.2 percent.

The herd is young with 19 first-calf heifers, many of which are recently fresh. Most of the mature cows selling have official records from 14,000M to over 19,000M, and although not now on official test the herd is producing well.

The bred heifers are pasture bred to the registered bull since October 20 and the younger heifers are well grown and in good condition.

There are daughters of Osborndale Ivanhoe, Spruceleigh Monogram Rag Apple, Emperor Duke Archie, Paclamar Capsule, Tidy Burke Jerry, Sizzler, Stylemaster and many other popular sires.

All personal property: Cash.

This architect's sketch is of the Hat & Gavel, modern new auction house which will open March 14 along Route 501, a mile north of Lititz. The owners, Wilbur H. Hosler and Jay M. Witman, are well known auctioneers in the area.

New Auction House to Open March 14

Auction houses usually bring to mind pictures of old barns or converted warehouses with makeshift facilities and a minimum of comforts.

And to find one, sale-lovers have had to travel over Ephrata way, or down Route 23, or toward York.

The picture has changed this year, however. Lititz is about to get a brand new modern auction house in its own backyard---complete with Colonial architecture, fluorescent lighting, and glass showcases.

The place: Hat & Gavel Auction House, located on Route 501 about one mile north of Lititz, scheduled for a grand opening on Thursday, March 14.

The owners are two young auctioneers from the area, Wilbur H. Hosler from Lititz and Jay M. Witman from Manheim RD3, who will run the new establishment and be the auctioneers for the sales planned for each Thursday evening.

Hosler, who is 31, and Witman, 21, have been working together at public sales for the past nine years, Witman starting as Hosler's helper when he was just 12 years old. The new auction house is the result of an idea they had about four years ago to open such a place for the Lititz-Manheim area, an area big on interest in public sales, but, until now, with no auction center of its own.

(Continued On Page 52)

Sale by
J. Warren Eshleman

HOWARD SHAUB, Auctioneer

New Auction House

(Continued From Page 51)

They chose the site for their building--a former field---because it was centrally located for the northern end of the county.

The name—Hat & Gavel—has been their insignia for the past few years, Witman explained.

"When you see an auctioneer, he usually has on an unusual hat and he always has a gavel with him," he said. "You just automatically think of hat and gavel when you think auctioneer."

One of the most modern auction houses in the county, the new brick building is Colonial in both exterior and interior design. It is 150 feet long by 60 feet deep, including a 32 foot long lobby.

The main hall has a seating capacity for 400 persons, and is designed with a raised stage platform at one end, and an auction block centered along one wall, both easily visable from the seating area.

A snack bar, offices, and rest rooms are located along one side of the hall. The opposite side is lined with big display tables flanking the auction block, and one entire end wall holds about 90 feet of glass showcases for china, glassware, and other smaller items.

The interior is lighted by drop ceiling fluorescent lights and is set up for air conditioning, expected to be installed by summer.

A loading dock has been built at one end of the house.

"We wanted an auction house that is clean and modern," Witman explained. "We wanted to get away from the 'old barn' concept."

The two will provide pickup service for sale items, and will be selling individual pieces as well as complete estates. The sale bill for the Grand Opening includes the estate of Ada Hackman, Manheim, and will be featuring a Chippendale-style desk, a Wenger Dutch cupboard, a pine chest, and a quantity of glassware and china.

The weekly sales will not curtail the two owners' other auctioneering activities, both planning to continue conducting public sales as in the past.

Hosler, who lives at 306 Owl Hill Rd., has been conducting public sales for the past 13 years, and works weekly at Vintage Sales Stables, Lancaster Stock Yards, and Bel Aire (Md.) Auto Auction, in addition to conducting estate sales.

Immediately after his graduation from Manheim Central High School in 1960, he enrolled in Repperts School of Auctioneering, Decatur, Ind., graduating from there the same year.

He is currently vice-president of the Southeastern Auctioneers Assn. and is a member of the National Auctioneers Assn. He is married and has three sons.

Witman also graduated from Manheim Central High School, class of 1970, and graduated from Repperts between his junior and senior years in high school.

One of the youngest auctioneers in the Southeastern Association, he started in the sale business with Hossler when he was 12 years old, and has been selling for three years. He is a past secretary-treasurer of the Southeastern Association and a member of the National Auctioneers Assn.

He lives with his mother, Mrs. Anna Mary Witman, at Manheim RD3.

Dividends Announced

The Board of Directors of National Central Financial Corporation declared a quarterly dividend of $.27 per share, payable April 10, 1974, to shareholders of record March 11, 1974, according to John C. Tuten, corporation chairman.

New 4-H Dairy Club Organized

An organizational meeting of the Ayrshire, Jersey and Brown Swiss 4-H Dairy club was held on March 4 at the home of Milton Brubaker, Lititz.

Officers were elected as follows: Brenda Eshleman, president; Warren Schmuck, vice president; Linda Witmer, secretary; Maureen Hough, treasurer; Lois Wanner, news reporter; Rusty Wilson, Teresa Kupp, game leaders; Kathy Kreider, song leader and Barbara Aaron, delegate to County Council.

The newly formed club decided that regular meetings will be held on the second Monday of each month, and a joint meeting with other dairy clubs is to be held on August 12, at the Farm and Home Center.

The next Dairy Club meeting will be held April 8, 7:30 p.m.

Pa. Livestock Exports Rise

Exports of Pennsylvania-bred livestock reached an all-time high of 1,166 head in 1973, Secretary of Agriculture Jim McHale announced. This figure compares with 1,060 head exported in 1972 and 146 in 1971.

The majority of the cattle were purebred Holsteins and went mostly to countries in Europe for breeding purposes.

"The quality of Pennsylvania dairy stock is becoming recognized around the world," Secretary McHale said. "Buyers from abroad are in the state almost continually seeking recognized breeding lines."

Most of the state-bred cattle sold for export are rounded up through the Pennsylvania Holstein Association, which cooperates with the export sales division of the National Holstein-Friesien Service.

Exports of Pennsylvania purebred livestock semen also has shown a dramatic rise in recent years as foreign breeders seek to upgrade their lines, Secretary McHale said. The number of ampules of semen exported from the state in 1973 totaled 55,979, compared with 28,433 the previous year. This contrasts with 146 ampules in 1971.

Exports of Pennsylvania horses totaled 3,191 last year, about twice as many as the year before.

By contrast, exports of eggs and chickens for breeding have shown an almost steady decline in recent years.

Sheep, swine and goats were exported from Pennsylvania in 1973, along with cats and dogs - and one rabbit.

While much of the Pennsylvania livestock was shipped by water, a sizable portion went by jet aircraft from the Harrisburg International Airport, which is becoming an increasingly popular exit point for air shipments of cattle from as far away as Wisconsin.

Six shipments via cargo jet from Harrisburg were made in 1973, accounting for a total of 1,067 animals. Destinations were Greece, Italy, Malta and Poland. So far in 1974 air shipments have been made to Iran and France. Shipments to France and Italy are expected in March and April.

The cattle are trucked to Harrisburg from all parts of this state and from a dozen other states and gathered at the Farm Show Building facilities. There they are checked by U. S. Department of Agriculture veterinarians. Only animals with a clean bill of health are allowed to be shipped.

Pa. Slaughter Numbers Rise

January 1974 slaughter of meat animals in Pennsylvania was up for all species except calves according to the Crop Reporting Service. Cattle slaughter increased 14 percent, hog slaughter 6 percent and sheep and lamb slaughter was up 20 percent from a year ago. Calf slaughter was down 26 percent from January a year ago.

Nationally, total red meat production was 2 percent more than a year earlier and 12 percent more than December 1973. Beef production was 1 percent more than January 1973 and pork 5 percent more but veal production was off 19 percent and lamb and mutton production down 11 percent.

PUBLIC SALE
SATURDAY, MARCH 16, 1974
9 A.M.

Located in Perry County, 8½ miles west of Marysville and 4 miles east of Shermansdale, and ½ mile south of Rt. 850. Watch for sale signs along Rt. 850.

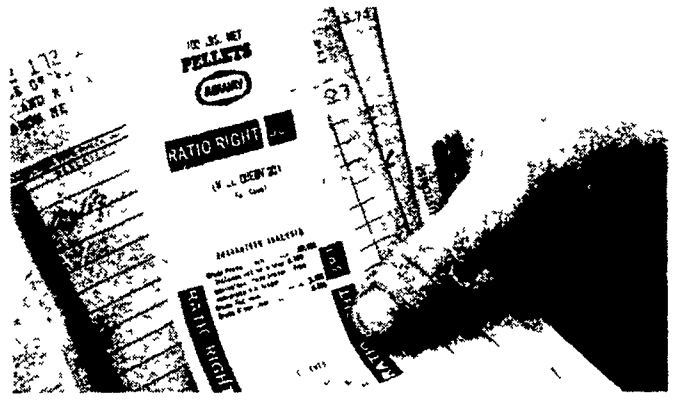
AGWAY

Agway Ratio:Right™ feeds the best way to beat the high cost of feed

Every time you change forages—begin feeding haylage, go to a new batch of hay or start another silo, for instance—you're changing the amount of protein and energy that's going into your cows. And nobody knows it better than you do. So what steps can you take to keep production up where you want it?

First—have your forage tested. Knowing the true value of your forage, in terms of protein and energy, is the only way you can eliminate assumptions and know exactly how to supplement to get top production over feed costs. You just can't make milk, profitably, on assumptions. So get a forage test. What do you do next?



Your best tool at this point is the Agway TDR (Total Dairy Ration) Profile program. It gives you, and the Agway Dairy Enterprise Salesman, all the information needed to select the proper concentrate to balance out your homegrown forages and to maintain top production at least cost. If you haven't taken advantage of the Agway TDR Profile, you're probably not getting all the value you should out of your crop program.

Once you know the facts—from a forage test and TDR Profile—it's easy to select the Agway Ratio:Right feed that gives you the exact amounts of energy and protein needed to balance the energy and protein in your forages. You don't have to overfeed protein to get enough energy—or overfeed energy to get enough protein. You buy only what you need and can't raise yourself.

Call Agway soon and ask for a Farm Enterprise Salesman.
He can help you take the steps you need to take
to keep on top of the feed cost squeeze.
